I. Public Assistance Programs: Applications and Cases October, 1979 compared with selected earlier months 14-16

II. Minnesota Public Assistance Program: Recipients and Payments October, 1979 compared with selected earlier months 17

III. Aid to Families with Dependent Children: Cases, Children and Payments by County - October, 1979 18-19

IV. General Assistance: Cases, Recipients and Expenditures - October, 1979 20-21

V. Medical Assistance: Recipients Concurrently Receiving SSI, MSA or AFDC - October, 1979 22-23

VI. Medical Assistance: Recipients Receiving Medical Assistance Only - October, 1979 24-25

VII. Supplemental Security Income and Supplemental Aid by County - October, 1979 26-27

TECHNICAL NOTES 28

GLOSSARY 29

October, 1979 - In Summary

All Programs - Persons aided increased in October as a result of more aged persons receiving medical allowances. The total of 201,205 was 616 (+0.3%) over September and 1,438 (+0.7%) over October, 1978. The annual trend also reflects primarily more senior citizens receiving allowances for medical care.

Costs, however, declined substantially reflecting fluctuations in payments for care of residents in state facilities for the mentally retarded and mentally ill. October costs were $56,200,096, 9,736,721 (-14.8%) below September, but $1,723,231 (+3.2%) above October, 1978. The annual trend occurred primarily in AFDC reflecting the increased standard effective July 1, 1979.

Aid to Families with Dependent Children (AFDC) - October expenditures totalled $14,269,811, off $134,617 (0.9%) from September. The major factor contributing to October's payment decline is higher IV-D refunds. This increase of $330,264 lowered the average payment per case by 1.1% and per person by 1.0%.

AFDC cases totalled 48,118 for the month, an increase of 64 (0.1%) above September and 1,149 (2.4%) over October, 1978. The major case increases occurred in three program categories - regular (+0.1%), unemployed father (+2.3%) and children in institutions (+12.9%). The other categories recorded slight declines.

In the 12-month period from November, 1978 through October, 1979, payments totalled $160,885,743 compared to $154,249,603 for the same interval one year earlier. This increase of $6,636,140 indicates that annual expenditures have increased 4.3%. Cases displayed an annual increase of 0.6%, averaging 47,361 per month in the current 12-month period and 47,080 per month in the previous interval.

Application activity remained relatively constant in September and October, 1979, with 3,003 and 3,025 cases approved respectively. Of the total approvals in October, 49.0% were new, 39.1% were reopened and 11.9% were transfers between counties. The composition of approvals for September, 1979 reflected 47.3% new, 43.4% reopened and 9.3% transfer cases. Applications received in October numbered 3,298, only five cases fewer than in September, 1979 and 308 (10.3%) cases greater than in October, 1978. The current October closings rose to 2,971, an increase of 114 (4.0%) above the previous September and 167 (6.0%) more than occurred in October one year ago. For every case closed in October, 1979, there were 1.02 cases opened.

In the first four months of fiscal year 1980 (July through October), payments rose $4,518,731 (8.6%) and the average monthly number of cases increased 1,149 (2.5%) above the comparable months in fiscal year 1979. The following table portrays the payments and average monthly cases by segment and the changes which occurred between the July through October period for the two fiscal years of 1979 and 1980:

	July - October, 1978		July - October, 1979			
	Payments	Cases	Payments	Change	Cases	Change
Total	$52,709,428	*46,693	$57,228,159	+ 8.6%	*47,842	+ 2.5%
Regular	47,492,759	43,160	51,840,176	+ 9.2%	44,405	+ 2.9%
Unemployed Father	1,980,536	1,242	2,133,914	+ 7.7%	1,290	+ 3.9%
Foster Care in Homes	1,577,523	1,273	1,575,258	- 0.1%	1,167	- 8.3%
Foster Care in Institutions	268,632	120	196,974	-26.7%	93	-22.5%
Unborn Only	1,188,895	1,105	1,294,174	+ 8.9%	1,222	+10.6%
Unborn Concurrent	201,083	578	187,663	- 6.7%	533	- 7.8%

*Unduplicated total; therefore, cases by segment will not add to total.

Emergency Assistance (EA) - Utilization of the Emergency Assistance Program continued to decline for the second month in succession. Expenditures in October were $319,421, falling $6,333 (1.9%) compared with September, 1979. Conversely, costs were $25,288 (8.6%) higher than expended in October, 1978. Cases receiving payment were 49 (3.6%) fewer than in the most recent month, but were 44 (3.5%) above October one year ago.

For the months of July through October of fiscal year 1980, total costs accrued to $1,347,963, a rise of $182,062 (15.6%) compared with the same four months in fiscal year 1978. In the July through October, 1979 period, the SMSA counties accounted for $1,155,592 (85.7%) of the costs, whereas the remaining $192,371 (14.3%) was attributed to the rural counties. Statewide during these two periods, the average monthly number of cases receiving payment per month reflected practically no change with a variation of only four cases. The following table portrays the expenditures and the average monthly number of case receivers statewide and by SMSA counties and rural counties for the period of July through October of fiscal year 1979 and 1980:

	Cases (Monthly Average) July through October Fiscal Year		Payments (Cumulative) July through October Fiscal Year	
	1980	1979	1980	1979
Statewide	1,363	1,367	$1,347,963	$1,165,901
SMSA	1,154	1,135	$1,155,592	$ 958,126
Rural	209	232	$ 192,371	$ 207,775

Medical Assistance (MA) - MA expenditures totalled $39,299,156 expended on behalf of 113,567 recipients for an average of $346.04. The expenditure decreased by $9,647,423 (19.7%) from the previous month, but increased by $616,308 (1.6%) from one year ago. The recipient count increased by 113 (0.1%) from the previous month, but decreased by 3,009 (2.6%) from one year ago. The average expenditure per recipient decreased by $85.38 (19.8%) from the previous month, but increased by $14.21 (4.3%) from one year ago.

However, September data included $11,820,437 in institutional payments - whereas for October, 1979, it was $3,286,201 and for October, 1978, it was $4,888,254; this caused the changes from September to be very significant. If these irregular payments were to be extracted, the following expenditure and utilization would result:

	Medical Assistance Excluding Institutional Payments		
Month	Recipients	Expenditure	Average Expenditure Per Person
October, 1978	113,718	$33,794,593	$297.18
September, 1979	110,985	37,126,142	334.51
October, 1979	112,632	36,012,955	319.74

Furthermore, skilled and intermediate nursing home costs increased noticeably for September and October, 1979 over October, 1978. For example, the per diem cost for October, 1978 was $23.18; this compared with $26.40 for September, 1979 and $25.99 for October, 1979. This accounted for a monthly cost increase of approximately $2,700,000. The following table illustrates the increased nursing home cost:

	Skilled and Intermediate Nursing Home Costs		
Month	Expenditure	Total Days	Per Diem Costs
October, 1978	$20,299,846	875,832	$23.18
September, 1979	23,864,619	904,085	26.40
October, 1979	23,457,465	902,571	25.99

Minnesota Supplemental Aid (MSA) - MSA expenditures totalled $792,442 for 10,753 recipients, an average of $73.69. The expenditure increased by $38,267 (5.1%) from the previous month and increased by $75,384 (10.5%) over one year ago. The recipient count increased by eight (0.1%) over the previous month, but decreased by 217 (2.0%) from one year ago.

During October, action was taken on 323 applications; 240 (74%) were approved, 71 (22%) were denied formally and 12 (4%) were denied informally (i.e., withdrawn). Another 120 applications had pending status at the end of the month; they include non-emergent applications received after the board meeting and applications received prior to the board meeting that were lacking required data.

There were 262 MSA cases closed during the month, which resulted in a net loss of 22 cases. The Aged category accounted for a net loss of 18 of those cases.

General Assistance (GA) - Recipients of this program numbered 11,329 during October. This is 399 (3.4%) below September and 744 (5.9%) fewer than one year ago. This decline occurred primarily in the Single category, which decreased by 376 (3.9%). The other person categories displayed a mixed pattern with Families with Children falling 86 (5.6%) while Families with Adults advanced by 63 (10.0%). The urban counties were the major contributors to this trend, declining by 430 recipients (5.0%), thereby offsetting the rural and suburban counties who experienced slight recipient increases.

The number of cases totalled 9,916 in October, 375 (3.6%) fewer than September and 492 (4.7%) below October, 1978. This month's case total is the lowest recorded since December, 1974.

Expenditures totalled $1,519,354, $13,473 (0.9%) more than September and $603 (0.0%) above October, 1978. The average payments recorded all-time highs at $153.22 per case and $134.11 per person. These payment increases are due to Emergency Fuel payments.

The county agencies received 4,056 GA applications during October, 334 (9.0%) greater than September. Of these, 3,688 (90.9%) were approved. Cases eligible for assistance totalled 12,702 or 43 (0.3%) fewer than September. Approximately 71% of these eligibles received assistance. Closings during August totalled 4,024 cases and represent an increase of 310 (8.3%) from September.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $40,115 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

TECHNICAL NOTES 28

GLOSSARY 29

November, 1979 - In Summary

All Programs - Payments recorded a monthly all-time high of $74,922,365, which was about $1 million above the previous high that occurred during January, 1979. The reason for these record payments was the backlog of claims for the care of patients in state facilities for the mentally retarded and mentally ill. Annual payments for the 12 months ending November, 1979 approached $700 million ($694,514,057).

Persons aided in November, at 202,749, countinued an upward trend. The monthly increase of 1,544 (+0.8%) occurred in the GA and MA Only Programs, and the annual increase of 4,601 (2.3%) occurred in the AFDC, GA, and MA Only Programs.

Aid to Families with Dependent Children (AFDC) - Payments for AFDC families declined $23,027 (0.2%) from October, and were $1,243,433 (9.6%) greater than in November, 1978. Families receiving payment were 89 (0.2%) fewer than the previous month, but were 1,323 (2.8%) higher than reported for November one year ago. Compared to October, 1979, the family decline occurred wholly within the SMSA counties, whereas the rural counties reported an increase. Families decreased 215 (0.6%) for the SMSA counties and increased 126 (1.0%) for the rural counties. The SMSA counties that reflected a drop in cases were Anoka - 81 (3.2%), Carver - 10 (4.5%), Dakota - 45 (2.6%), Hennepin - 115 (0.8%), Polk - 9 (2.4%), Ramsey - 14 (0.2%), Stearns - 8 (1.1%) and Washington - 12 (1.3%). In comparison with November, 1978, the rural counties gained 950 (7.9%) cases and the SMSA counties gained 373 (1.1%) cases. Thus, 71.8% of the case increase was attributed to the rural counties. The 18 rural counties with the largest percentage increase in families appeared to be geographically clustered, with the exception of three counties, as the following table indicates:

Southeast Corner:

Goodhue	18.6%
Wabasha	11.7
Winona	14.4
Houston	30.3

North Central:

Crow Wing	22.5%
Hubbard	18.2
Wadena	29.5
Morrison	10.7
Mille Lacs	11.0

Southwestern:

Region VIII No.	16.7%
Nicollet	15.9
Redwood	25.0
Nobles	16.4

Isolated (Not Clustered):

Pope	34.3%
Meeker	29.2
Carlton	11.8

Middle South Border:

Waseca	16.2%
Freeborn	22.2

The unemployed father segment increased by 41 (3.1%) cases above October, 1979 and 271 (25.1%) cases over November, 1978. Expenditures increased 3.2% and 33.9% above the costs for October, 1979 and November, 1978, respectively. Twenty-nine (29) counties reported no payments for unemployed fathers compared to 35 counties in November, 1978.

Applications approved totalled 2,465 in addition to 366 transfers between counties. The number of approvals represented a decline of 6.4% from October, 1979 and an increase of 6.4% from November, 1978.

Closings also were fewer than in October, declining 226 (7.6%), but were 114 (4.3%) above the total closings for November, 1978. For every case closed in November, 1979, there were 1.03 cases opened.

Emergency Assistance (EA) - During November, this program was used by 1,271 families in need, 44 (3.3%) fewer than October. This case total duplicated the number of families aided in November, 1978.

Recipients numbered 4,373 this month, 203 (4.4%) below October and 14 (0.3%) less than one year ago. Expenditures also declined, falling $1,478 (0.4%) from October to $317,943, a total $44,616 (16.3%) ahead of November, 1978.

This month, "Other Families" represented 52.6% of expenditures in contrast to November, 1978 when it represented 42.5% of the total. November represented the first time in the last 23 months (since January, 1978) that "Other Families" dominated the program in numbers of families, persons and expenditures. Typically, the EA Program is utilized by AFDC families beset by additional financial difficulties. However, when emergencies occur, such as the steel strike in late 1977 or the current fuel crisis, a predominance of "Other Families" results. This is likely to continue through spring and the end of the heating season.

The emergencies of Eviction from Shelter, Emergency Fuel and No Employment accounted for 52.7% of November's payments. Eviction from Shelter was the most prevalent emergency, representing 23.7% of expenditures, followed by Emergency Fuel (17.2%) and No Employment (11.8%).

Emergency Fuel Expenditures, the newest EA category, totalled $54,635, an increase of $10,725 (24.4%) above October.

Medical Assistance (MA) - MA expenditures for November totalled $57,968,647, incurred on behalf of 115,657 recipients for an average cost of $501.21. Monthly comparisons follow:

1. The November expenditure was $18,669,491 (47.5%) larger than the previous month and $24,512,692 (73.3%) larger than November of last year.

2. The November recipient count was 2,090 (1.8%) above the previous month and 723 (0.6%) below November of last year. The MA Only case load is basically increasing in the Aged category, and most of that increase resulted from increased utilization of nursing home care.

3. The average grant for November was $155.17 (44.8%) greater than the previous month and $213.74 (74.4%) greater than November of last year.

The large expenditure increase reflected for November resulted from Institutional payments being processed en masse for several months of service. The Institutional payments totalled $19,256,588 for November, $17,734,987 for MR recipients and $1,521,601 for MI/CD recipients.

Since the Institutional population is relatively static, its recipient count reflected little change when payments were processed en masse. However, the average grant increase paralleled the respective expenditure increase.

Minnesota Supplemental Aid (MSA) - MSA expenditures totalled $822,896 for 10,751 recipients - an average grant of $76.54. This reflected an expenditure increase of $30,454 (3.8%) more than the previous month and $56,024 (7.3%) more than the November expenditure one year ago. The recipient count decreased by 2 (0.02%) from the previous month and 151 (1.4%) from one year ago. The average grant increased by $2.85 (3.9%) from the previous month and increased by $6.20 (8.8%) over one year ago.

The MSA population has remained fairly static over the past 12 months; the monthly average was 10,860 recipients. The trend, however, shows that the monthly recipient count declined an average of 13 recipients per month over the last year, which is an average decline of 0.1% monthly.

In contrast, the MSA expenditure reflected an average monthly increase of $6,983 over the past 12 months, which averages out to 0.9% monthly. The average monthly MSA expenditure for this time period was $772,455.

The average grant reflected an average monthly increase of $0.82 over the last 12 months; this reflected a monthly increase of 1.2%.

General Assistance (GA) - The number of persons receiving General Assistance totalled 12,037 during November. This was an increase of 708 (6.2%) from October and, in retrospect, was 187 (1.6%) above November, 1978. This increase was attributed to advances in the Single and Families with Children categories, up 586 (6.4%) and 132 (9.0%) respectively. Recipients in Families with Adults displayed a mild decline, falling by 10 (1.4%).

Cases and expenditures also increased in November. Cases advanced by 603 (6.1%) from October and were 243 (2.4%) ahead of one year ago. Expenditures increased 46,741 (3.1%) from the previous month and were $63,885 (4.3%) more than November of 1978.

There were 3,991 applications received in November, 65 (1.6%) fewer than October. Of these applications, 3,573 (89.5%) were approved. Cases eligible for assistance totalled 12,251 or 451 (3.6%) fewer than the previous month. Nearly 76% of these eligibles received assistance. Closings during the month totalled 3,141 and represented a decline of 883 (21.9%) from October.

This was the first month during 1979 where cases, persons and payments were above the 1978 level. The General Assistance Program appeared to have bottomed out and is now increasing in response to higher unemployment brought about by a slowing economy. Single cases led the increase, particularly in the urban counties. Ramsey and St. Louis Counties displayed the greatest advance with 14.6% and 11.7% respectively. Hennepin County was third at 2.8%.

The change in St. Louis County possibly was the result of subtle changes in local business volume, for this county is not as economically diversified as the Twin Cities. A change in the production and shipping of taconite, grain and other commodities could noticeably have affected the economy and unemployment rates in this northern county. However, the typical change in seasonal employment patterns appear to be the best explanation. Between October and November, unemployment in St. Louis County increased .7% from 5.1% to 5.8%. The Twin Cities, by comparison, only advanced .3% to 3.5% within this period. Ramsey County's advance in single cases may be attributed to changes in seasonal employment, too, yet minor local economic anomalies should not be ruled out.

SOCIAL CONSCIENCE IN HISTORY

> *But wee, for all the statutes that hitherto can be devised, and the sharpe execution of the same in poonishinge idle and layze persons, for wante of sufficient occasion of honest employmente, cannot deliver our commonwealthe from multitudes of loyterers and idle vagabondes. Truthe it is, that throughe our longe peace and seldome sicknes (twoo singular blessinges of Almightie God), wee are growen more populous than ever heretofore; so that nowe there are of every arte and science so many, that they can hardly lyve one by another, nay rather they are readie to eate upp one another; yea many thousandes of idle persons are within this realme, which, havinge no way to be sett on worke, be either mutinous and seeke alteration in the state, or at leaste very burdensome to the commonwealthe, and often fall to pilferinge and thevinge and other lewdnes, whereby all the prisons of the lande are daily pestered and stuffed full of them, where either they pitifully pyne awaye, or els at lengthe are miserably hanged, even XX*^{ti} *at a clappe oute of some one jayle.*

—— Richard Hakluyt in "Discourse Concerning Western Planting," written in 1584; quoted in Introduction to the *First Annual Report of the U.S. Commissioner of Labor*, 1886, p. 12.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $8,001 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 29

GLOSSARY 30

December, 1979 - In Summary

All Programs - Trends were mixed in December, 1979 as more persons were aided (up 2.7%), but costs declined (down 10.0%). This is not necessarily an unusual occurrence as the processing of medical claims often results in this pattern. November, 1979 medical payments were unusually high because of a backlog of claims paid for patients in state residences for the mentally retarded and mentally ill (a relatively small population). The December decline in payments for this group more than offset an increase in medical payments for other MA recipients.

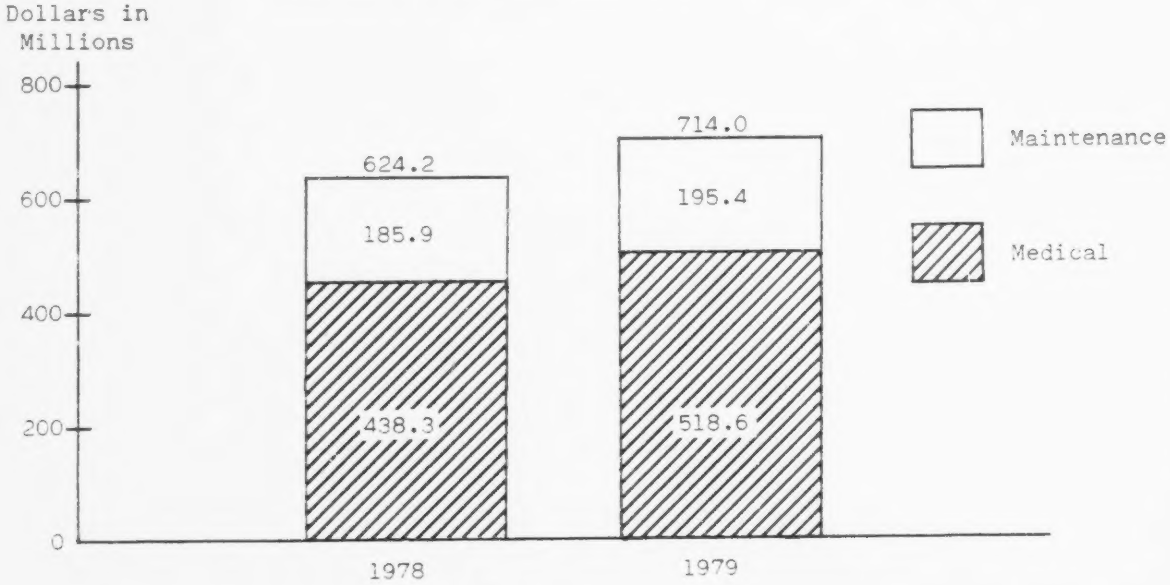
Total payments in December, 1979 were still the third highest in the last 12-month period at $67,400,550. The monthly decline was $7,521,815 (-10.0%), while the annual trend shows an increase of $19,465,918 (+40.6%). (There were no institutional payments made in December, 1978.)

There were 208,162 persons aided in December, 5,413 (2.7%) above the previous month and 8,757 (+4.4%) over December, 1978. The annual trend includes 3,423 more aged persons, 1,464 AFDC recipients, 2,988 disabled persons, and 974 needy children (GA shows a slight partial offsetting decline).

Calendar Year 1979 - Total expenditures for the calendar year of 1979 recorded a high of $713,980,000. This is 14.4% over 1978 with medical costs showing a 18.3% increase as follows:

Type of Care	1979 Expenditures	Change from 1978
Maintenance	$195.41M̅	$ 9.55M̅ (5.1%)
Medical	$518.57M̅	$80.24M̅ (18.3%)
Total	$713.98M̅	$89.79M̅ (14.4%)

Public Assistance Expenditures
Maintenance and Medical
Calendar Years 1978 and 1979



Aid to Families with Dependent Children (AFDC) - Maintenance payments for AFDC declined $185,727 (1.3%) compared to such payments for November, 1979. This occurred despite an increase of 225 (0.5%) cases receiving payment. The increased cost for the additional cases was offset by an increase in support payments of $240,189. Support payments tend to fluctuate widely in various months due to the sporadic reporting by Aitkin, Anoka, Carver, Clay, Dakota, Fillmore, Freeborn, Polk, and Rice Counties. These nine mentioned counties often lump several months' collections into one month.

Increases in payment cases were reported for both the SMSA and rural counties. The rural counties accounted for 74.7% of the case increase, while representing 27.3% of the state case total. Statewide, the unemployed father segment showed the highest increase, reflecting a gain of 154 cases or 68.4% of the total trend. Of the total case rise in unemployed fathers, 68.4% resided within the rural counties.

Approvals in December totalled 2,801, down 30 (1.1%) from November. The composition of the December case approvals was 1,300 new, 1,199 reopened and 302 transfers. The SMSA Counties accounted for 66.9% of all approvals. Overall, reopened cases were 42.8% of the additions. The SMSA Counties reflected proportionately a higher rate of reopened cases (45.6%), whereas the rural counties' percentage rate was 37.1%. For every closing in December, 1979, there were 1.13 cases opened.

AFDC maintenance costs from July through December, 1979 accrued to $85,536,000. This compares with $78,277,219 for the same six months in 1978. Thus, costs for the current six-month period represented an increase of $7,258,781 (9.3%). During the above-mentioned periods, cases receiving payment increased from a monthly average of 46,738 to 47,942, a rise of 2.6%.

Compared to December, 1978, the current maintenance payments were $1,496,617 (11.9%) higher. This was caused by a case increase of 1,300 (2.8%). Contributors to the rise in payments are the 7% increase in the basic needs standards on July 1, 1979, the higher payment case load, and lower IV-D collections.

Emergency Assistance (EA) - During December, this program declined in all major categories - cases, recipients and payments. This represents the fourth consecutive month of decline.

Recipients numbered 4,191 this month, 182 (4.2%) fewer than November, but 72 (1.7%) more than December, 1978. Cases followed a similar pattern, off 65 (5.1%) from November to 1,206. It was 26 (2.2%) greater than one year ago.

The category displaying the greatest change was expenditures, which totalled $296,939. It was $21,004 (6.6%) less than November, but $22,986 (8.4%) above December, 1978.

This month, "Families Not Receiving AFDC" represented 52.3% of families assisted and 60.4% of program expenditures. This represented an increase of 8.4% and 11.6% respectively from one year ago.

The emergencies for Eviction from Shelter, Emergency Fuel and No Employment accounted for 58.2% of December's payments. Eviction from Shelter was the most prevalent emergency, representing 26.8% of expenditures, followed by Emergency Fuel (14.7%) and No Employment (16.7%).

Emergency Fuel, the newest EA category, totalled $43,599, a decline of $11,036 (20.2%) from November.

Medical Assistance (MA) - MA expenditures for December totalled $50,615,794 for 131,050 recipients for an average of $386.23. The expenditure reflected a $7,352,853 (12.7%) decrease from the previous month and an increase of $17,812,577 (54.3%) from one year ago. The recipient count reflected an increase of 15,393 (13.3%) from the previous month and an increase of 14,037 (12.0%) from one year ago. The average cost per recipient decreased by $114.98 (22.9%) from the previous month and increased by $105.49 (37.6%) from one year ago.

To better understand why the MA Program recorded significant changes from prior months, the following facts must be acknowledged:

1. December, 1978 had two warrant cycles processed totalling $12,939,093, nursing home payments totalling $19,863,393, and institutional payments totalling $731 (adjustments only).

2. November, 1979 had two warrant cycles processed totalling $13,464,383, nursing home payments totalling $25,247,675, and institutional payments totalling $19,256,588.

3. December, 1979 had three warrant cycles processed totalling $18,130,230, nursing home payments totalling $24,256,793, and institutional payments totalling $8,228,771.

Through December (i.e., July - December, 1979), the fiscal year expenditure totalled $279,123,944, which averaged $46,520,657 monthly. The corresponding recipient count averaged 118,278 recipients monthly. The average monthly number of eligible recipients for this time period was 202,100. Thus, in this six-month period, the average monthly cost for each recipient that utilized MA services was $393.32 and the average monthly cost per eligible recipient was $230.19.

Minnesota Supplemental Aid (MSA) - MSA expenditures totalled $804,338 and 10,733 recipients - an average of $74.94. Compared to the previous month, the total expenditure decreased by $18,558 (2.3%) and the recipient count decreased by 18 (0.2%). Compared to one year ago, the expenditure increased by $65,234 (8.8%), while the recipient count decreased by 177 (1.6%).

The average monthly expenditure for July - December, 1979 reflected an 8.8% increase over July - December, 1978. The negotiated rates for recipients in board and care facilities were mainly responsible for this increase. For example, during December, 1979, there were 2,334 MSA recipients who lived in board and care facilities with negotiated rates. The significance of this is that almost 50% of the total MSA expenditure was incurred by these recipients.

The average monthly recipient count for July - December, 1979 reflected a decrease of 1.6% from July - December, 1978. The Aged category accounted for 85.5% of the total recipient decrease, while the Blind and Disabled categories accounted for respective decreases of 6.7% and 7.8%.

The net loss, reflected in the recipient count, can be traced to the block of recipients transferred to the MSA Program back in January, 1974. Included in that group were persons that had never been covered under the Social Security Program who ended up with little or no income upon retirement, mainly persons who worked in the agricultural field. Essentially, they remain on the MSA Program as long as they live. Therefore, gradual attrition of this group is expected to cause the MSA population to decrease steadily in the future.

During December, the MSA Program issued $6,951 in "Emergency Fuel Assistance" to 36 recipients, which averaged $193 per recipient. This compared with $17,028 and 76 recipients during November for an average of $224. During October, it was $5,328 and 29 recipients for an average of $184.

Forty-three percent (43%) of the emergency fuel assistance recipients also received an ongoing MSA grant during the month they received fuel assistance. Their average grant for emergency fuel assistance was $211.99. Since SSI planned to issue $250 for emergency fuel assistance to each recipient during their January mailing, it should include most of the MSA recipients because most of them receive SSI. Those excluded from the $250 payment from SSI have to receive the supplement through the MSA Program; however, they could receive both.

During the October - December, 1979 quarter, 31 counties issued payments for emergency fuel assistance. Thirteen (13) counties issued payments for fuel assistance during October, 19 during November, and 11 during December. Twenty (20) counties issued these payments only one of the three months, 10 counties issued them two of the three months, and only one, Ramsey County, issued them all three months. The following table identifies the counties that have issued emergency fuel assistance during this quarter:

Emergency Fuel Assistance,
Recipients and Payments by County

County	Recipients	Expenditure
Benton	2	$ 296.37
Carlton	6	2,886.00
Cass	3	364.00
Chippewa	1	87.90
Chisago	1	234.00

Nobles	1	200.66
Pipestone	1	246.19
Ramsey	41	7,978.26
Renville	2	737.55
St. Louis	14	2,175.89
Sibley	1	216.23
Stearns	4	366.20
Steele	2	1,044.86
Todd	1	313.00
Washington	2	1,039.66
Wilkin	1	177.80
Winona	3	479.91
Total	141	$29,312.79

The previous table was based on data reported by counties who claimed the proposed 100% reimbursement. There were four additional counties (Beltrami, Brown, Kandiyohi and Swift) that reported emergency fuel assistance payments on the Case Information (CI) File, but didn't claim the 100% reimbursement rate during the quarter.

Since the counties are required to key all the MSA special needs payments into the CI File, it is significant to note that most counties failed to do it. For example, 20 (64.5%) of the 31 counties that claimed 100% reimbursement didn't input any of the emergency fuel assistance payments into the CI File for any of the months in the quarter. Ten (10) counties reported partial data, while only one county reported everything.

There were two provisions of the emergency fuel assistance program that perhaps explain why the number of recipients aided wasn't larger. First, each MSA recipient had to make separate application for this aid - it wasn't automatic. Second, each MSA recipient had to exhaust their cash reserves before they qualified; however, counties have the authority to waiver real and personal property in excess of the program limitation. Currently, the MSA Program allows personal property up to $300 for single aged and disabled recipients ($450 if married) and $2,000 for single blind recipients ($4,000 if married).

General Assistance (GA) - In December, 12,172 persons were aided by this program. This is an increase of 135 (1.1%) from November and is 70 (0.6%) fewer than recorded in December of 1978.

The greatest numerical change occurred in the Single category, which increased by 200 (2.0%). The Families with Adults category also displayed an increase, of 51 (7.5%), but this was more than offset by Families with Children, which declined by 116 (7.9%).

The recipient increase was focused in the rural and suburban counties. The rural counties displayed the greatest change, with Single recipients, Families with Children and Families with Adults up 169 (12.0%), 91 (13.3%) and 32 (13.9%) respectively. The suburban counties witnessed nominal advances, and then only in the Single and Families with Children categories. The urban counties, by comparison, declined in all recipient areas.

The number of cases receiving assistance, and expenditures, each advanced this month. Cases numbered 10,722 in December, 203 (1.9%) above November. Expenditures, at $1,622,422, displayed a greater rate of increase, rising $56,327 (3.6%).

During December, the county agencies received 4,074 applications, 83 (2.1%) more than in November. Of these applications, 3,614 (88.7%) were approved. Cases eligible for assistance totalled 12,722 or 471 (3.8%) above the previous month. Approximately 77% of those eligible received assistance. Closings during December numbered 3,366 and represented an increase of 225 (7.2%) from November.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $11,156 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/ Osteopathic Service, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

GLOSSARY 32

The Relationship of Unemployment to the Unemployed Parent Category of AFDC and to Emergency Assistance

It is widely known that unemployment affects welfare case, recipient and payment levels. What is obscure, however, is the extent of this relationship. If this association were better understood, this knowledge would be of value in analysis and could also be used for predictive purposes.

To address this relationship, it was first necessary to determine the welfare program(s) that would logically reflect the unemployment situation. The unemployed parent category of AFDC was one of those selected because it is, by its very nature, a resource to be utilized by those unemployed who have families containing minor children. The second program chosen for investigation was Emergency Assistance. This selection was prompted by the observation that "no employment" is continually reported as a major cause of emergency within this program.

Information on these variables was assembled for a two-year period from July, 1977 through June, 1979. Graphs were then prepared showing these activity areas over the designated period to provide a visual record or indicator of change. These graphs appeared to confirm the hypothesis that relationships existed between Unemployment and AFDC-UP and Emergency Assistance. Next, the association of these variables was examined.

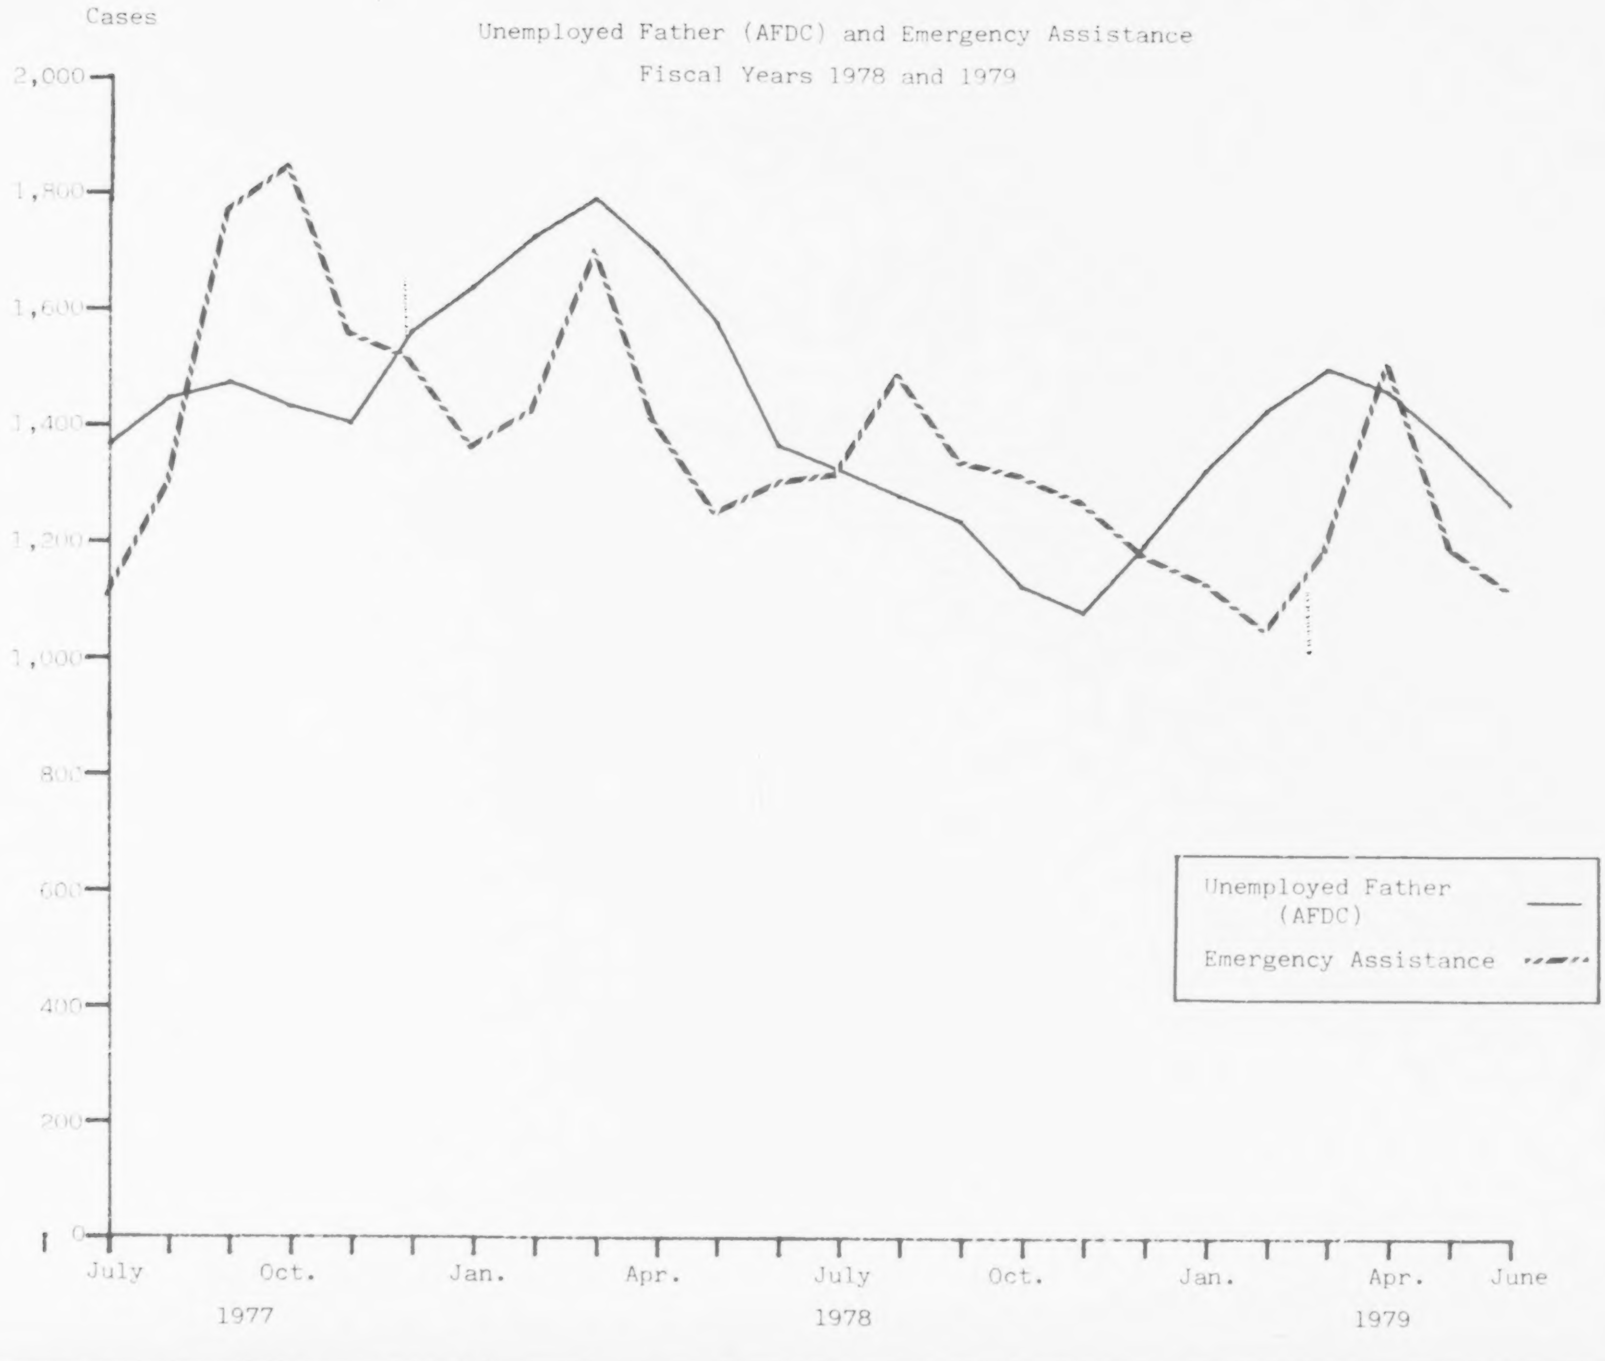
A linear regression of unemployment and AFDC-UP compared corresponding months and produced a moderate correlation coefficient of .4704. However, it was observed from the graphs that the unemployed parent activity high points lagged a few months behind the peaks in unemployment. Therefore, the UP data was offset by two months and the association was once again tested. This resulted in a correlation of .7906, a definite improvement.

The relationship of Unemployment and Emergency Assistance was examined next. The first regression involving the entire EA Program resulted in a correlation of -.1526, which is of little value as a predictor. Then, the association of the non-AFDC (other) segment of EA was tested. The correlation generated was positive but, at .135, still represented a poor association. Next, the data was lagged by two months to see if this time interval would strengthen the relationships. It did! The resulting correlations were .4622 for the EA Program, but only .2647 for the non-AFDC (other) segment. This was surprising since it was not thought that the AFDC segment would display such strength or display a higher correlation than the non-AFDC (other) segment. What could be the explanation for this anomaly?

The data suggests that the influence of the AFDC-Unemployed Parent category, along with those other working AFDC caretakers, is stronger than anticipated (approximately 30% (28.7%) of all AFDC cases involved working caretaker-relatives in the April - September, 1979 period according to the latest AFDC Characteristic Study).

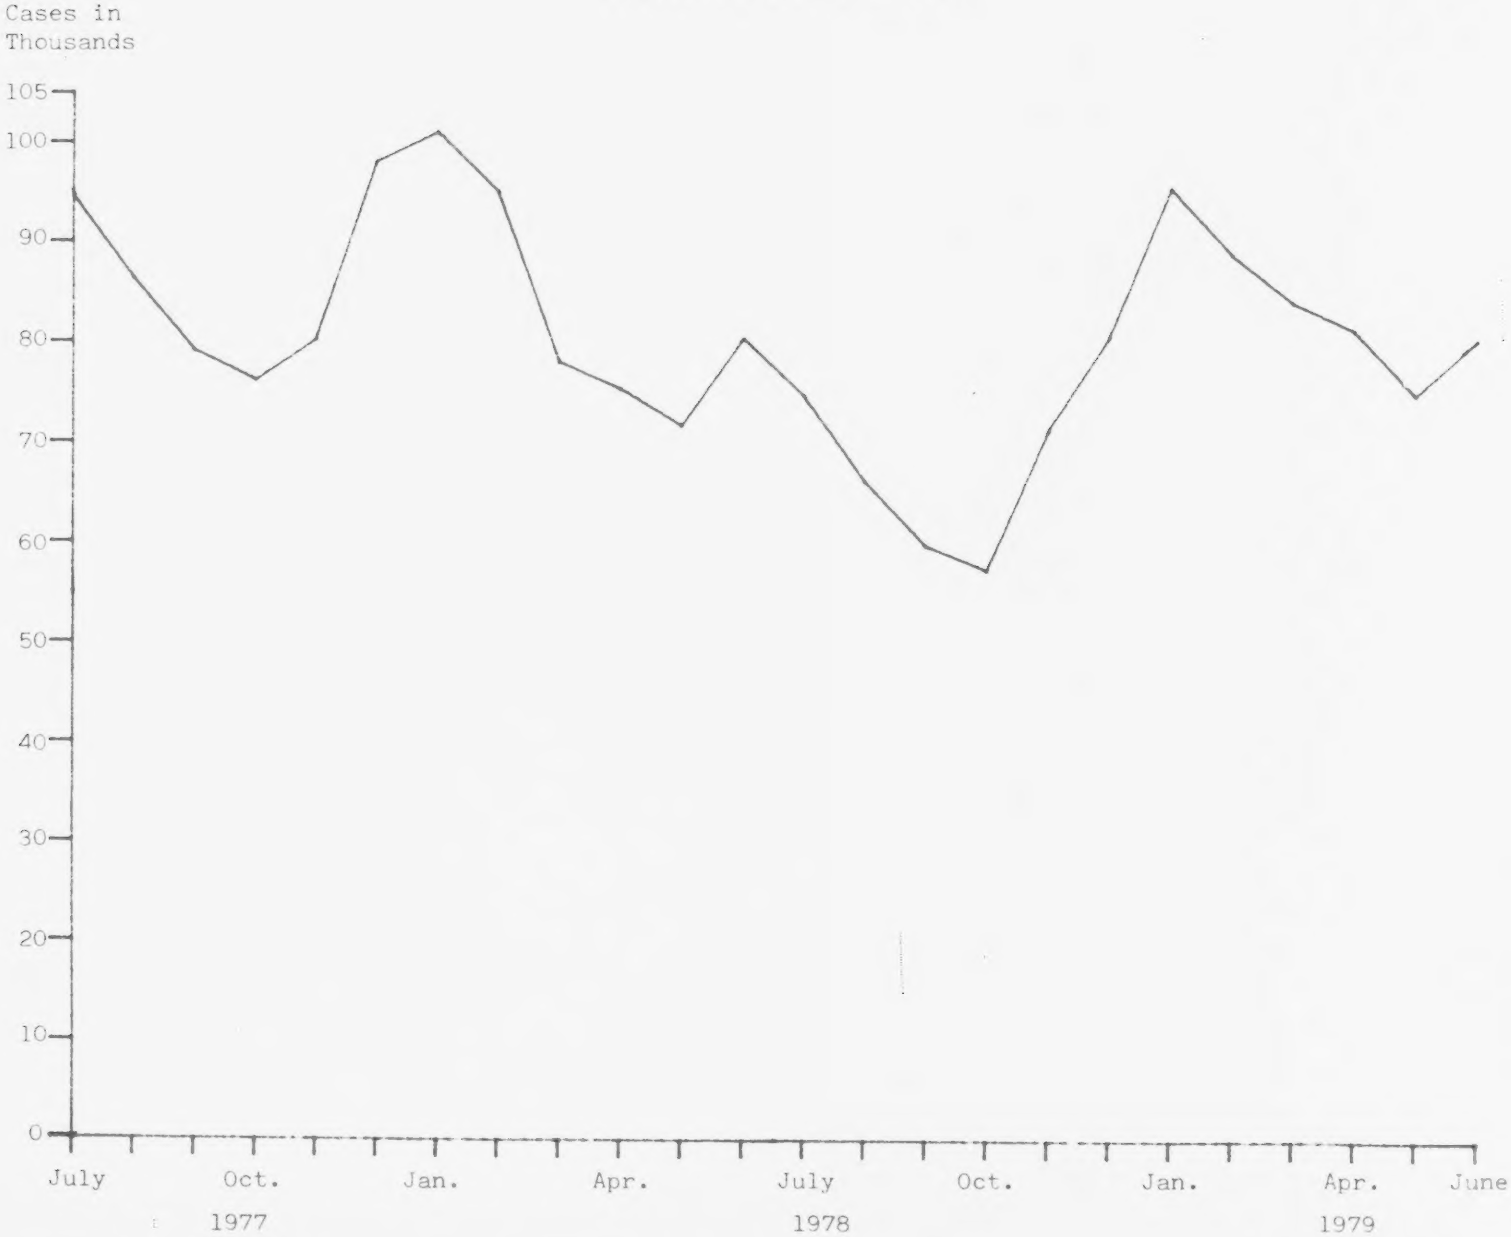
Secondly, the correlation of .2647 for the non-AFDC segment suggests that the counties may be reporting inaccurately on their monthly reports. The non-AFDC segment should be more strongly tied to the labor market than the AFDC group so their association should be greater. Therefore, we are faced with the prospect that the county information has not been categorized properly. Apparently, the unemployment code is being overemphasized to the extent that it is becoming a catchall category.

Unemployed Father (AFDC) and Emergency Assistance
Fiscal Years 1978 and 1979



Minnesota Unemployment Levels

Fiscal Years 1978 and 1979



January, 1980 - In Summary

All Programs - Persons receiving aid in January declined slightly as a result of fewer persons receiving medical allowances. There were actually 2,930 more persons receiving maintenance assistance in January as employment activity began to slow down during the winter months, but this was more than offset by a drop in medical only cases. The December medical case count was high because of the three warrant cycles occurring in that month (warrants are paid on a biweekly cycle resulting in two three-warrant cycles each year). The total number of persons aided was 207,546 in January, 616 (-0.3%) below December, but 2,853 (+1.4%) above January, 1979.

Total payments show somewhat the same pattern. The $62,408,744 January payments were $4,991,806 (-7.4%) below December, 1979 and $11,478,189 (-15.5%) below one year ago. In the annual trend, medical payments were unusually high a year ago because of irregular state institution payments.

Aid to Families with Dependent Children (AFDC) - January expenditures totalled $14,159,293, an increase of $98,235 (0.7%) from December, 1979. This change was the result of an additional 445 cases receiving payment and a $29,851 reduction in IV-D collections. Compared with January, 1979, payments were $1,030,044 (7.8%) higher and cases were 1,545 (3.3%) greater.

In the current month, the rural counties displayed the greatest change, rising 249 (1.9%), whereas the SMSA counties reported an increase of 196 (0.6%).

During January, $59,076 was expended for special needs and $88,402 issued for emergency fuel assistance. The major portion (73.9%) of the special needs expenditures was for the replacement of essential household furnishings or major appliances. Payments for emergency fuel were made to 442 families containing 1,404 persons. Fuel assistance was supplied to less than 1% (0.9%) of the cases receiving payment. In the rural counties, 1.7% of the cases received fuel assistance while, in the SMSA counties, only 0.6% of the cases received this aid.

In the four months from October, 1979 through January, 1980, $396,893 was issued for emergency fuel. The highest monthly cost thus far, $127,083, occurred in October. During this four-month period, an average of 518 families received emergency fuel assistance monthly. The fuel assistance payments ranged from a low of $179.17 per family in December, 1979 to a high of $200.00 in January, 1980. The 12 counties of Grant, Lac Qui Parle, Mahnomen, Nicollet, Nobles, Norman, Pennington, Red Lake, Roseau, Stevens, Traverse and Waseca made no payments for emergency fuel. Of the rural counties, Beltrami fuel costs were the highest, totalling $22,363. This represented 19.4% of the total rural expenditures in this four-month period.

Emergency Assistance (EA) - During January, this program advanced in all major categories - cases, recipients, and payments. This reversal follows four consecutive months of decline and may point to increased activity in the months ahead.

Recipients numbered 4,451 in January, 260 (6.2%) more than December and 472 (11.9%) greater than January, 1979. This month, AFDC recipients were a majority by a narrow margin and represented 50.5% of the total. Cases advanced by 114 (9.5%) from December to 1,320. This is 186 (16.4%) higher than one year ago.

January's expenditures of $337,357 rose $40,418 (13.6%) from December and $87,392 (35.0%) above January, 1979.

The most common emergencies in January, Eviction from Shelter, Emergency Fuel, and No Employment, together accounted for 53.3% of January's payments. Eviction from Shelter was the most frequent emergency representing 29.8% of expenditures, followed by No Employment, 15.0%, and Emergency Fuel, 8.5%.

Emergency Fuel expenditures totalled $28,711, a decline of $14,888 (34.1%) from December..

Medical Assistance (MA) - Expenditures for January totalled $45,319,455 for 121,301 recipients, an average of $373.61.

The expenditure decreased by $5,296,337 (10.5%) from the previous month and was $1,029,602 (2.2%) less than the average monthly expenditure incurred for the current fiscal year. The total expenditure for the first seven months of the 1980 fiscal year was $324,443,400; this compares with $280,307,504 for the first seven months of fiscal year 1979, a 15.7% increase.

The recipient count decreased by 9,749 (7.4%) from the previous month and was 2,592 (2.2%) less than the average monthly recipient count for the current fiscal year. The average monthly recipient count for the first seven months of fiscal year 1980 was 118,709; this compared with 119,853 for the first seven months of fiscal year 1979, which reflected a 1.0% decrease.

The average monthly expenditure per recipient for January decreased by $12.62 (3.3%) from the previous month and was $16.83 (4.3%) less than the average cost increment for the first seven months of the 1980 fiscal year. The average monthly expenditure per recipient for the first seven months of fiscal year 1980 was $390.44 compared with $334.11 for fiscal year 1979, a 16.9% increase.

The January figures reflected decreases from December in all categories listed. This was due primarily to the fact that there were three warrant cycles processed during December.

Also, the January figures reflected decreases when compared to the fiscal year-to-date figures. This resulted because these fiscal year-to-date figures reflected two months that three warrant cycles were processed, namely July and December. State institutional payments were also irregular during this period and included payments back to March, 1979.

Long-Term Care and Program Expenses - The cost of long-term care has always been the major item of expenditure in the Medical Assistance Program since it began in 1966. Prior to 1966, long-term care was a major cost factor - at 50% of the total medical bill - but hospitalization was also a factor at approximately 28% of the total costs. With Medicare, assuming hospital costs for the aged (except for co-insurance payments) in 1966, long-term care costs assumed a much larger share of the medical dollar. The data for the last four years show that the proportion is not only larger, but is growing. In the last four calendar years, the ratio has changed from 58.4% in 1976 to 64.9% in 1979.

Data has become available in recent years showing other medical care provided for nursing home residents, i.e., physical therapy, physician services, etc. This, therefore, provides information on the total amount of medical care provided this group of recipients. In 1979, long-term care residents actually accounted for 71.7% of the total MA dollar rather than 64.9%. This is presented in the following table:

Medical Assistance Expenditures
Total Program, Long-Term Care, and Ancilliary Services
Calendar Years 1976 - 1979

	Expenditures (000 Omitted)					
Year	Total	Long-Term Care	%	Ancilliary Services	%	Combined Percentage
1976	$328,277	$191,696	58.4%	$19,339	5.9%	64.3%
1977	394,821	246,107	62.3%	22,347	5.7%	68.0%
1978	438,269	276,509	63.1%	28,779	6.6%	69.7%
1979	$518,568	$336,743	64.9%	$35,494	6.8%	71.7%

Cost of ancilliary services shows consistent increases each year. This has resulted both from greater utilization by nursing home residents and higher average payments. The predominant factor is the average payment and most of this represents inflation. Of the 32,979 nursing home patients in December, 1979, 28,058, or 85.1%, had a payment made for ancilliary services.

Minnesota Supplemental Aid (MSA) - Expenditures for January totalled $815,170 for 10,727 recipients, an average of $75.99.

The Aged expenditure increased by 9.4% compared to the previous month, from $191,399 to $209,452, and the recipient count increased by 0.4%, from 3,356 to 3,375. The average grant for this group increased by 8.8% from December, from $57.03 to $62.06.

The Blind expenditure increased by 3.7% compared to December, from $12,417 to $12,871, and the recipient count increased by 1.2%, from 161 to 163. The average grant reflected a 2.4% increase, from $77.12 to $78.96.

The Disabled expenditure decreased by 1.3% compared to December, from $600,522 to $592,848, and the recipient count decreased by 0.4%, from 7,216 to 7,189. Thus, its average grant decreased by 0.9%, from $83.22 to $82.47.

The composite expenditure increased by $10,832 (1.3%) compared to December and the recipient count decreased by six (0.1%). The composite average grant increased by $1.05 (1.4%) from the previous month.

General Assistance (GA) - The number of persons receiving General Assistance totalled 13,666. This was an increase of 1,494 (12.3%) from December and, in retrospect, was 711 (5.5%) above January, 1979. This increase is attributable to advances in all recipient categories - Single, Families with Children, and Families with Adults, up 927 (9.3%), 442 (23.0%), and 125 (17.0%) respectively. Only one category, Families with Children, displayed a mixed pattern. Here, the urban and rural counties reported recipient increases which more than offset the decline of 25 (12.1%) experienced by the suburban counties.

The number of cases totalled 11,828 in January, 1,106 (10.3%) more than December and 757 (6.8%) above one year ago. This is the highest number of cases since August of 1978.

Expenditures reached $1,777,469. This is $155,047 (9.6%) higher than recorded in December and is $147,508 (9.0%) more than January of 1979.

There were 4,639 applications received in January, 565 (13.9%) more than December. Of these applications, 4,148 (89.4%) were approved. Cases eligible for assistance numbered 13,538 or 816 (6.4%) more than the previous month. Approximately 78% of these eligibles received assistance. Closings during the month totalled 3,567 and represent an increase of 201 (6.0%) from December.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $5,730 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

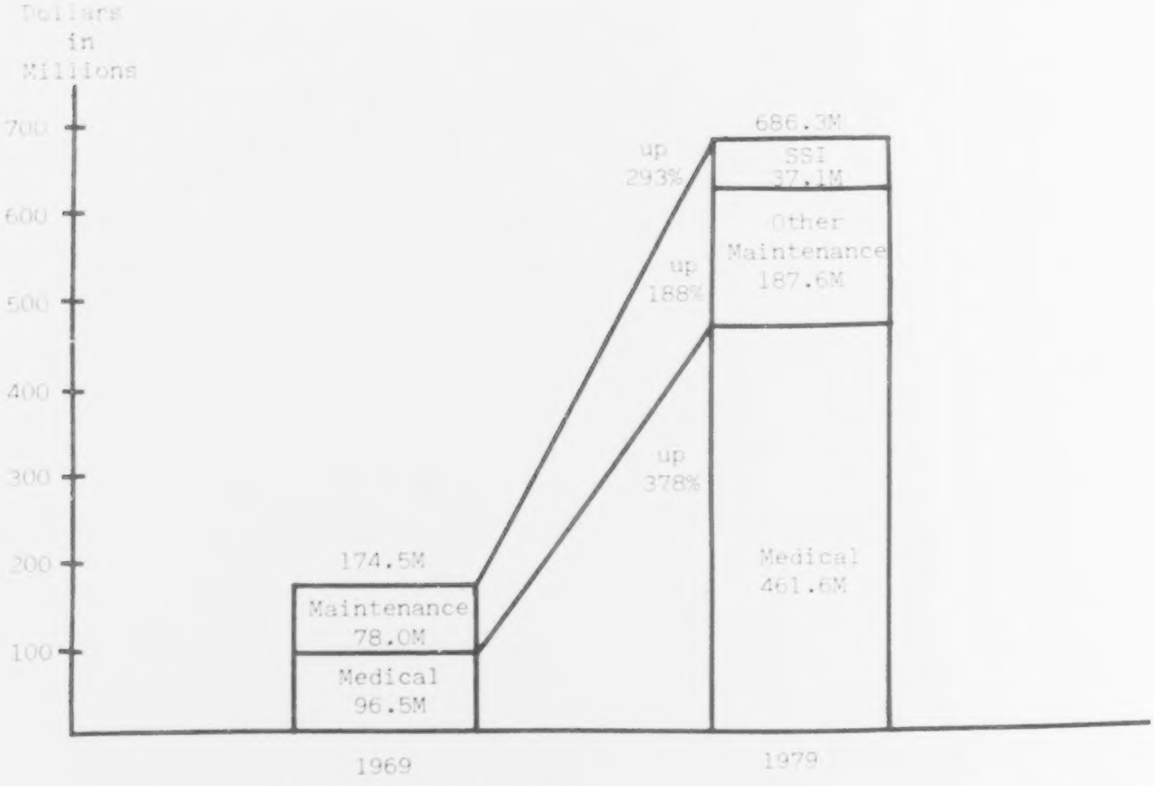
GLOSSARY 34

Contributing Factors for Growth
in the
Medical Assistance Program
Ten-Year Trend
Fiscal Years 1969-1979

Introduction

The change in Minnesota's welfare expenditures over the last 10 years has been considerable. In this time period, costs increased 293%. For fiscal year 1979, Public Assistance expenditures (i.e., MA, AFDC, GA, EA, MSA, and SSI) totalled $686.3 million, an increase of $511.8 million over fiscal year 1969. This growth is attributable primarily to higher medical costs, which reflects inflation, increased recipient participation, program additions and policy/program changes. Medical care expenditures displayed an increase of 378%, whereas maintenance expenditures increased by 188%. This can be observed in Exhibit A below.

Exhibit A
Total Public Assistance Payments
Classified by Assistance Payments* and Medical Payments**
Fiscal Year 1979 Compared with Fiscal Year 1969
(A Ten-Year Trend)



*Includes AFDC, EA, GA, MSA and SSI

**Does not include General Assistance Medical Care Costs

The following paragraphs will focus briefly on the Medical Assistance (MA) Program and isolate the impact of specific changes that occurred over the 10-year period. There are essentially four major identifiable causal factors behind this expenditure increase. Since inflation is at the forefront of current economic concerns, this will be examined first. Thereafter, the remaining factors will be addressed.

Inflation

To understand the impact of this phenomenon on Minnesota's MA Program, it is necessary to address a number of relevant issues. These include the Consumer Price Index (CPI), its components, the applicability of this index to the MA Program and, finally, MA Program characteristics. Though lengthy, this effort should put the $131.2 million inflationary increase in perspective.

The CPI for medical care increased by 110.6%, from 113.9 to 239.9 from July, 1969 to July, 1979, for an average city in the United States. This medical index reflects the composite costs of medical care commodities and services for the average noninstitutionalized consumer or household at a given point in time. Prescribed drugs and medical supplies comprise the commodity segment of this index and represents 17.3% of the medical CPI. Services, on the other hand, are separated into physician, dental and other practitioners' services, which account for 40.4% of the index while hospital services represent 42.3%.

The CPI, while useful, unfortunately does not adequately reflect the long-term care aspects of the MA Program. Also, its applicability is lessening with time. For instance, during fiscal year 1969, only 43.0% of the MA expenditures for commodities and services were applicable to the medical CPI. Ten (10) years later, in fiscal year 1979, this percentage had declined by 11.3% to 31.7%. The following table shows this change and the respective relevance of the CPI for each of these years:

Medicaid Expenditure Distribution for Selected Services

	1969		1979		
	Expenditure	% (Total)	Expenditure	% (Total)	CPI Weight
Prescribed Drugs	$ 9,375,319	9.7%	$ 19,822,136	4.3%	17.3%
Medical Supplies	159,907	0.2	3,115,421	0.7	
Physician Services	8,392,366	8.7	29,607,581	6.4	40.4%
Dental Services	2,407,100	2.5	10,616,807	2.3	
Other Practitioners' Services	540,179	0.6	2,800,927	0.6	
Inpatient Hospital	19,000,751	19.7	69,810,694	15.1	42.3%
Outpatient Hospital	1,521,014	1.6	10,431,451	2.3	
Other (Non-CPI Related)	$55,136,126	57.0%	$315,410,003	68.3%	0.0%
Total MA	$96,532,762	100.0%	$461,615,020	100.0%	100.0%

Next, it is necessary to look at the medical CPI and compare it to equivalent commodities and services in the MA Program. By using the average cost incurred per recipient as a unit cost, it can be used to determine the growth of MA expenditures, due to inflation, for the 10-year period. The unit costs are calculated based on 12-month samples for each respective year. Each unit cost is then weighted relative to the total cost comparisons in order to allocate a value that reflects the total expenditure for each of the service categories. The following table shows the process used to determine these values:

Weighted Unit Costs for CPI-Related Services

	1969			1979		
	Unit Cost	Weight	Weighted Unit Cost	Unit Cost	Weight	Weighted Unit Cost
Prescribed Drugs	$ 84.33	.231	$ 19.48	$ 108.24	.158	$ 17.10
Medical Supplies	N/A	--	--	N/A	--	--
Physician Services	86.18	.202	17.41	133.20	.202	26.91
Dental Services	55.83	.058	3.24	98.88	.073	7.22
Other Practitioner's Services	54.74	.014	.77	62.28	.018	1.12
Inpatient Hospital	632.43	.458	289.65	1,285.80	.476	612.04
Outpatient Hospital	$ 45.57	.037	$ 1.65	$ 102.00	.073	$ 7.45
Total	$ --	1.000	$332.20	$ --	1.000	$671.84

The weighted unit costs for 1969 and 1979 provide an adequate breakdown for comparing each service category relative to their combined total expenditure. Each of the weighted unit costs must then be measured against the CPI weight that each carries. This is necessary because all of the service categories don't carry equivalent weight. The following table shows how the weighted unit costs and the CPI weights are applied to determine one composite weighted average:

Composite Weights for CPI-Related Service Categories

	1969			1979		
	Weighted Unit Cost	Weight	Composite Weight	Weighted Unit Cost	Weight	Composite Weight
Prescribed Drugs	$ 19.49	.173	$ 3.37	$ 17.10	.173	$ 2.96
Medical Supplies	N/A	--	--	N/A	--	--
Physician Services	17.41	.404	7.03	26.91	.404	10.87
Dental Services	3.24	.404	1.31	7.22	.404	2.92
Other Practitioner's Services	.77	.404	.31	1.12	.404	.45
Inpatient Hospital	289.65	.423	122.52	612.04	.423	258.89
Outpatient Hospital	$ 1.65	.423	$ .70	$ 7.45	.423	$ 3.15
Total	--	--	$135.24	--	--	$279.24

The total composite weights are the figures that can then be compared to reflect the growth of CPI-related services. As indicated in the previous table, the CPI-related services increased from $135.24 to $279.24 over the 10-year period. This means that the CPI-related services reflected a 106.5% increase in 10 years.

The remaining service categories (i.e., the non-CPI-related service categories), where averages were available, reflected a 10-year growth of 149.7%. Almost 95% of this expenditure was accounted for by nursing home care. The total weighted average for this group of services increased by $2,945.31 over the 10-year period, from $1,966.67 to $4,911.98. The procedure used for arriving at the total average unit cost (weighted) was identical to the two previous tables except that no CPI weight was applied because all these service categories presumably carry equivalent weights. Details on how these figures were determined are shown in the following table:

Weighted Unit Costs for Non-CPI-Related Service Categories

	1969			1979		
	Yearly Average	Weight	Weighted Average	Yearly Average	Weight	Weighted Average
SNF	$ 722.66	.036	$ 28.54	$6,013.32	.567	$3,409.55
ICF I & II	2,154.45	.898	1,934.70	3,941.52	.378	1,489.89
Laboratory	27.27	.014	.38	18.60	.001	.02
Home Health	50.07	.001	.05	269.76	.009	2.42
Other	$ 58.91	.051	$ 3.00	$ 224.52	.045	10.10
Total	$ --	1.000	$1,966.67	$ --	1.000	$4,911.98

The previous tables cover about 82% of the total MA expenditure incurred for fiscal year 1979. The 18% that is excluded reflects expenditures for services where comparable unit costs are unavailable for both of the fiscal years considered. Since about 90% of this expenditure includes institutional and private care for the mentally retarded, it parallels the increases reflected in skilled and intermediate care facilities and will be treated similarly.

The growth within the MA Program has been uneven, with non-CPI-related services increasing at a rate 40.6% higher than the CPI-related services. To put this dichotomy into perspective, it is necessary to develop a composite index of expenditure growth. This composite index is shown below and clearly demonstrates that the medical CPI alone is an inadequate measure of the MA Program growth:

Composite Index Computation for MA

Services	Average Growth	Weight	Weighted Average Growth
CPI Equivalents	106.5%	.317	33.8%
Non-CPI Equivalents	149.7%	.683	102.2%
Total	--	1.000	136.0%

Therefore, the 136.0% growth rate can be applied to the 1969 expenditure to determine how much of the increase for fiscal year 1979 was attributable to inflation. In real dollars, this amounts to $131.2 million, or 35.9% of the total 10-year increase. It reflects the growth in the MA Program caused by inflation assuming a static population.

In summary, medical services that cost $96.5 million in 1969 actually cost $227.7 million in 1979 (i.e., $96.5 million plus $131.2 million).

Increased Recipient Participation

The recipient participation in the MA Program increased by 69.4% from 1969 to 1979. This reflects the case load growth according to the number of different recipients that utilized MA services within the 12-month sample periods for each respective year. Since the overall growth includes the mentally retarded for 1979 but not 1969 (they were added subsequent to 1969), they must be excluded from this section. They will be accounted for in the next section. Excluding them reduces the increased recipient participation to 63.0%. The 63.0% increase is based on the fact that there were 179,728 different recipients that utilized MA services in the 12-month sample period in 1969 compared to 192,996 in 1979.

Since the static population incurred MA costs totalling $227.7 million in 1979, the increased recipient participation rate can then be applied to it in order to determine the additional cost incurred by the additional recipients. In real dollars, $143.5 million was incurred by the additional recipients. This reflects how much of the total 1979 MA expenditure was incurred by the 113,268 additional recipients.

Therefore, 39.3% of the MA expenditure increase over the 10-year period was attributed to increased recipient participation.

Additional Coverage

Four distinct service categories were added to the MA Program between fiscal year 1969 and 1979. They weren't buried in existing service categories, which means that they were uniquely identifiable. They include 1) intermediate care in private facilities for the mentally retarded, 2) institutional care for the mentally retarded, 3) early and periodic screening and diagnosis services for children and 4) psychiatric care. These four service categories accounted for $77.5 million in expenditures during fiscal year 1979, or 21.2% of the total expenditure increase for MA over the 10-year period.

Other Qualitative Changes

This section includes all cost increases that weren't uniquely identifiable. These expenditure increases were masked in existing service categories because coverage was merely expanded without changing the service category structure. Subtle program or policy changes cause expenditure increases of this type. These increases are often justified on the basis that they improve the quality, or intensity, of care that is made available to recipients. In essence, this section reflects the residual of the combined total of the three previous sections when compared to the total expenditure increase that resulted over the 10-year period. In real dollars, this section accounted for $12.9 million, or 3.6% of the total expenditure increase.

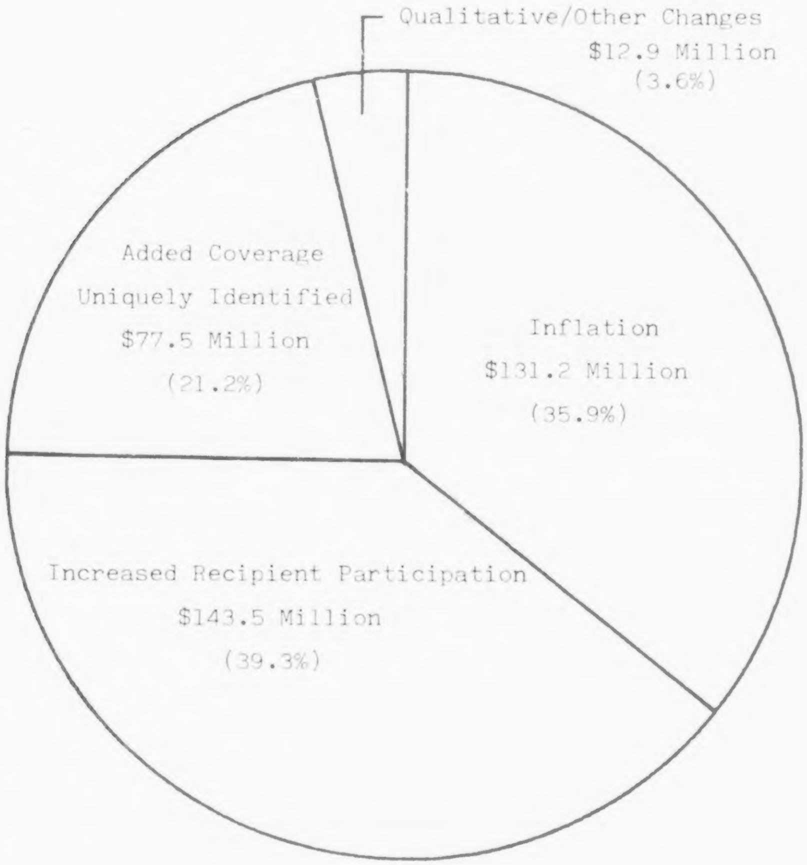
Summary

Exhibit B provides a breakdown of the factors responsible for the increase in medical costs over the 10-year period. From Exhibit A, we have learned that between fiscal year 1969 and fiscal year 1979, medical expenditures increased by $365.1 million. The impact of each of the four factors outlined in this analysis is as follows:

Exhibit B

Medical Care Expenditure Increase from Fiscal Year 1969 to 1979

Contributing Factors



Some of the factors that cause medical costs to escalate are very obscure. Inflation is one such factor that perhaps is most frequently used to explain increases. For that reason, much of the emphasis in this report has centered on inflation and how it relates to the MA Program. Hopefully, a clearer perspective will result from this analysis.

February, 1980 - In Summary

All Programs - More persons were aided in February as the AFDC case load recorded an increase of 609 families with 1,747 persons. This trend was partially offset by fewer persons aided in the other programs. Total persons aided were [illegible], [illegible] above January, 1980 and 8,[illegible] (+4.1%) over February, 1979. The AFDC program also dominates the annual trend, but all programs (except MSA) recorded higher case loads over the year.

Despite the increased case load, expenditures were down in February (-$2,122,157 or -3.4%) as a result of a drop in payments for residents in the state facilities for the mentally retarded and mentally ill. The February expenditures of $60,286,187 are up, however, by $9,184,002 (+18.0%) as a result primarily of state institution payments, nursing home costs and AFDC payments. All programs recorded increase in payments over the year.

Aid to Families with Dependent Children (AFDC) - In February, 1980, AFDC maintenance payments were $14,636,087, or $477,394 (3.4%) above January, 1980, and $1,248,359 (9.3%) higher than expended for February, 1979. Cases also were up, rising by 609 (1.2%) to 49,799. The payment case load for February represents an increase of 2,110 (4.5%) compared with the previous February.

The rise in maintenance costs for the current month is attributed to the additional cases receiving payment and to a reduction in support collections of $211,900. Of the case increase, 44.5% occurred in the rural counties and 55.5% in the SMSA counties. Of the payment increase, the rural counties accounted for 33.5%, the SMSA counties 66.5% of the total.

The following table shows the numbers, amounts and percentage changes which occurred in persons and payments by AFDC segment in February compared with January:

Segments	Persons	Payments
Regular	+1,089 (0.9%)	+$371,688 (2.9%)
Unemployed Father	+ 68 (9.3%)	+$ 76,421 (10.8%)
Foster Care in Homes	+ 6 (0.4%)	+$ 21,451 (5.7%)
Foster Care in Institutions	+ 12 (10.7%)	+$ 3,666 (6.8%)
Unborn Only	- 19 (0.9%)	+$ 3,533 (1.1%)
Unborn Concurrent	- 23 (3.9%)	+$ 635 (1.3%)
	+1,747	+$477,394

Emergency fuel payments declined to $60,865, the lowest since such payments were implemented. A total of 324 AFDC families were aided. The average fuel payment per family was $187.85. Proportionately, the rural counties reported a higher utilization rate than did their counterpart, the SMSA counties. The rural counties expended 46.7% of the total statewide payments for 46.6% of the families aided. The total statewide emergency fuel expenditures through February, 1980 was $487,758.

In February, total cases approved dropped 232 (7.3%) below January. Reopened cases comprised 43.8% of all approvals, rising slightly (1.6%) over January. Closings also declined in February, decreasing 235 (8.9%). For every case closed, there were 1.22 cases opened. Two of the major reasons given for closings were no longer an eligible child in home and increased earnings. The number of denials remained stable, declining by only 9 (2.7%) cases. The predominant reasons given for denials were income exceeds standards and failure to comply with procedural requirements.

Emergency Assistance (EA) - During February, this program declined in all major categories - cases, recipients and payments. This decline is attributed to 366 (16.3%) fewer AFDC persons aided during the month.

Recipients totalled 4,152 in February, 299 (6.7%) fewer than January and 554 (15.4%) greater than February, 1979. This month, "non-AFDC recipients" were in the majority and represented 54.7% of all persons assisted. Cases declined by 97 (7.3%) from January to 1,223. This is 171 (16.3%) higher than one year ago.

February's expenditure was $319,551, a drop of $17,806 (5.3%) from January, but $82,792 (35.0%) higher than February, 1979.

The most common emergencies in February, Eviction from Shelter, No Employment, and Emergency Fuel Assistance together represented 50.5% of February payments. Eviction from Shelter was the most prevalent emergency, representing 28.9% of expenditures, followed by No Employment, 10.8%, and Emergency Fuel, 10.8%.

Emergency Fuel Assistance totalled $34,533, an increase of $5,822 (20.3%) from January.

Since the inclusion of Emergency Fuel Assistance within the EA Program in October, 1979, $205,388 has been expended for fuel by county agencies. This expenditure represents 12.9% of the payments within this period.

Emergency Fuel Assistance
by Month

	Families	Recipients	Expenditures
October, 1979	167	630	$ 43,910
November	241	959	54,635
December	198	765	43,599
January, 1980	143	560	28,711
February	151	572	34,533
Total	900	3,486	$205,388

Medical Assistance (MA) - MA expenditures for February totalled $42,602,793 for 116,100 recipients, an average of $366.95.

The expenditure decreased by $2,716,662 (6.0%) from the previous month, but increased by $7,482,475 (21.3%) from one year ago. The latter trend occurred mainly because there were no major institutional payments processed during

February, 1979. Institutional payments usually average approximately $5,000,000 each month for 2,400 recipients. Higher nursing home costs account for the remainder.

The recipient count decreased by 5,201 (4.3%) from the previous month, representing fewer recipients in four service categories (i.e., Outpatient Hospital, Prescribed Drugs, Physician and Dental), but increased by 2,463 (2.2%) from one year ago, representing the state institution recipients.

Therefore, the average expenditure per recipient decreased by $6.66 (1.8%) from the previous month, but increased by $57.89 from one year ago.

Minnesota Supplemental Aid (MSA) - MSA expenditures for February totalled $855,153 for 10,697 recipients, an average of $79.94. Expenditures increased by $39,983 (4.9%) from the previous month while the recipient count declined by 30 (0.3%). The average grant per person increased by $3.95 (4.9%).

Most of the expenditure fluctuation from the previous month occurred in the disabled category, which apparently reflects the increased cost of congregate care. The aged category actually reflected a decline in net expenditures from the previous month. The blind category showed a slight increase in expenditures. The following table shows the recipient count and expenditure charges from January to February for each MSA eligibility category:

	Recipients			Expenditures		
	January, 1980	February, 1980	Change	January, 1980	February, 1980	Change
OAA	3,375	3,350	-0.7%	$209,452	$201,345	-3.9%
AB	163	161	-1.2%	$ 12,871	$ 13,805	+7.3%
AD	7,189	7,186	*	$592,848	$640,003	+8.0%
Total	10,727	10,697	-0.3%	$815,170	$855,453	+4.9%

*Less than .05

General Assistance (GA) - In February, 13,818 persons were served by this program. This is an increase of 152 (1.1%) from January and is 1,355 (10.9%) more than reported in February, 1979.

Single recipients displayed the greatest change, advancing 332 (3.0%). The impact of this change was offset because of declines in each of the family categories which, together, decreased by 180 recipients or 6.5%. The only advances registered in the family categories were in the suburban counties, whose family with children category increased by 100 (55.2%) and in the rural counties where families with adults changed by 9 (3.0%).

The number of cases receiving assistance and expenditures each advanced during February. Cases totalled 12,088 or 260 (2.2%) more than January. Expenditures, at $1,872,403, displayed a greater rate of increase, rising $94,934 (5.3%).

During February, the county agencies received 4,464 applications for assistance, 175 (3.8%) fewer than January. Of the 4,872 applications on hand, 4,063 (83.4%) were approved. The number of cases eligible for assistance totalled 14,046 or 508 (3.8%) more than the previous month. Approximately 79% of those eligible received assistance. Closings during February numbered 3,587 and represented an increase of 20 (0.6%) from January.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) This footnote usually specifies the EPSDT charges that are billed and included under several other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. This breakdown is unavailable for February, 1980 because of computer problems.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 30

GLOSSARY 31

March, 1980 - In Summary

All Programs - Persons aided in March, 1980 totalled 214,236, 5,724 (+2.7%) over the previous month and 11,798 (+5.8%) above March, 1979. The monthly trend represents primarily more persons receiving medical allowances, as more claims were processed in March, while the annual trend is about evenly divided between medical only persons and maintenance persons (AFDC and GA). The downward trend in persons aided ended in June, 1979* when 198,181 persons received assistance and, since then, the trend has been upward and in March, 1980 is at about the same level as two years ago--March, 1978. The following table presents the two-year trend:

	Persons Aided	Change From	
	March, 1980	March, 1979	March, 1978
Total Persons	214,236	+11,798 (+5.8%)	- 647 (-0.3%)
Maintenance	161,220	+ 6,474 (+4.2%)	-2,878 (-1.8%)
Medical Only	53,016	+ 5,324 (+11.2%)	+2,231 (+4.4%)

Maintenance persons were still below the level two years ago, with the General Assistance Program accounting for most of the difference.

March, 1980 expenditures were $63,434,502, 3,147,915 (+5.2%) above February, 1980, $10,264,502 (+19.3%) over March, 1979, and 10,565,957 (+20.0%) above March, 1978. Medical costs accounted for most of this trend.

Aid to Families with Dependent Children (AFDC) - March payments were $180,246 (1.2%) below February, 1980 despite an increase of 278 (0.6%) cases receiving assistance. This inverse relationship is attributed to an increase in IV-D (child support) collections, which were $332,493 (28.0%) more than February. During March, 1980, support payments represented 9.5% of the total gross expenditure as compared with 7.5% for February, 1980.

The net payments for March, 1980 were $1,599,110 (12.4%) higher than for March, 1979. Two significant factors contributing to increased costs over the previous March are the rise in the basic standard on July 1, 1979 and the additional 1,986 (4.2%) cases receiving aid.

Net expenditures for the first three quarters of fiscal year 1980, from July 1, 1979 through March 31, 1980, were $128,788,420. This compares with $117,652,126 for the same nine months in fiscal year 1979, or a rise in net expenditures of $11,136,294 (9.5%). During the same time period, cases increased from a monthly average of 46,929 in fiscal year 1979 to 48,359 in fiscal year 1980.

*In November, 1978, 198,148 persons were aided, but this did not include state institution cases.

The following tables show the quarterly changes in net payments, cases and IV-D collections for fiscal years 1979 and 1980:

Payments

	1979	1980	Percent Change Per Quarter
July - September	$ 39,445,352	$ 42,958,349	+ 8.9%
October - December	$ 38,831,867	$ 42,577,651	+ 9.6%
January - March	$ 39,374,907	$ 43,252,420	+ 9.8%
Total	$117,652,126	$128,788,420	+ 9.5%

Cases (Monthly Average)

	1979	1980	Percent Change Per Quarter
July - September	46,600	47,750	+ 2.5%
October - December	46,876	48,133	+ 2.7%
January - March	47,311	49,191	+ 4.0%
Monthly Average	46,929	48,359	+ 3.0%

IV-D Collections

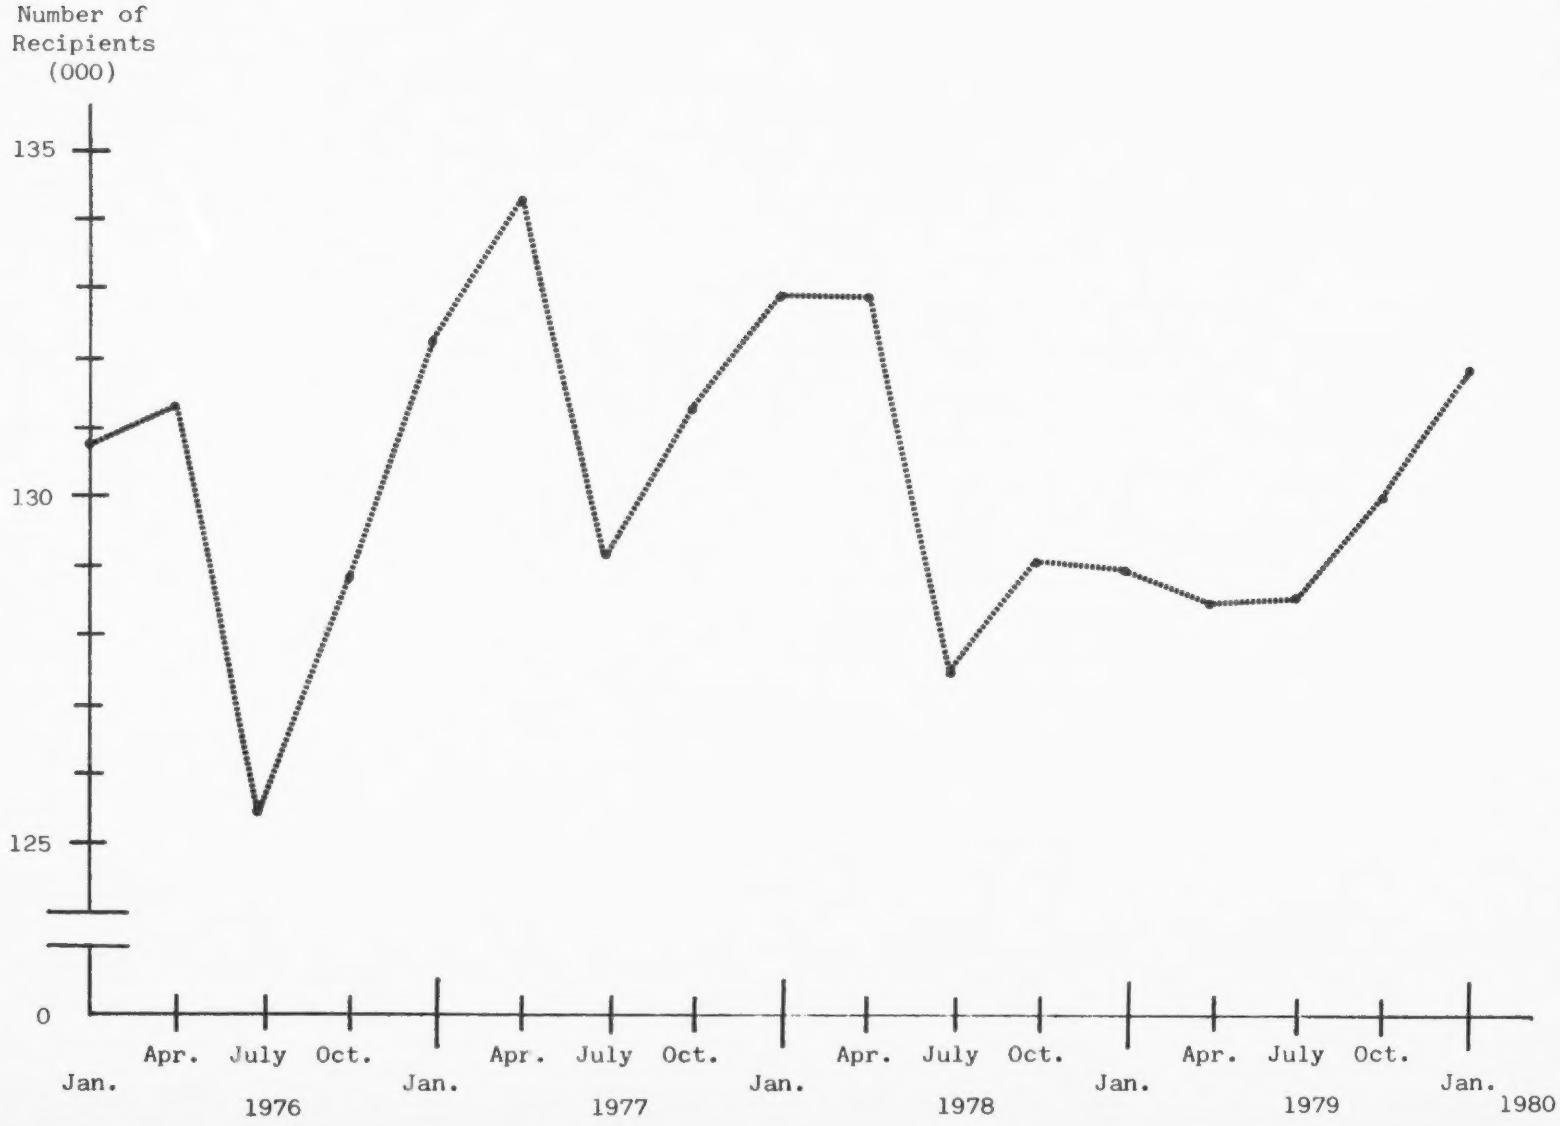
	1979	1980	Percent Change Per Quarter
July - September	$ 3,273,193	$ 3,449,262	+ 5.4%
October - December	$ 3,657,229	$ 4,052,667	+10.8%
January - March	$ 3,542,123	$ 4,107,048	+15.9%
Total	$ 10,472,545	$ 11,608,977	+10.9%

AFDC recipients reached 134,300 in March, 783 (0.6%) more than February and 4,766 (3.7%) above one year ago. This is the highest recipient total since March, 1977. A graph displaying the number of AFDC recipients quarterly during the four-year period from January, 1976 to January, 1980 is shown on page 3.

Cases totalled 49,577 during March. This is 278 (0.6%) more than the previous month and 1,986 (4.2%) above March, 1979.

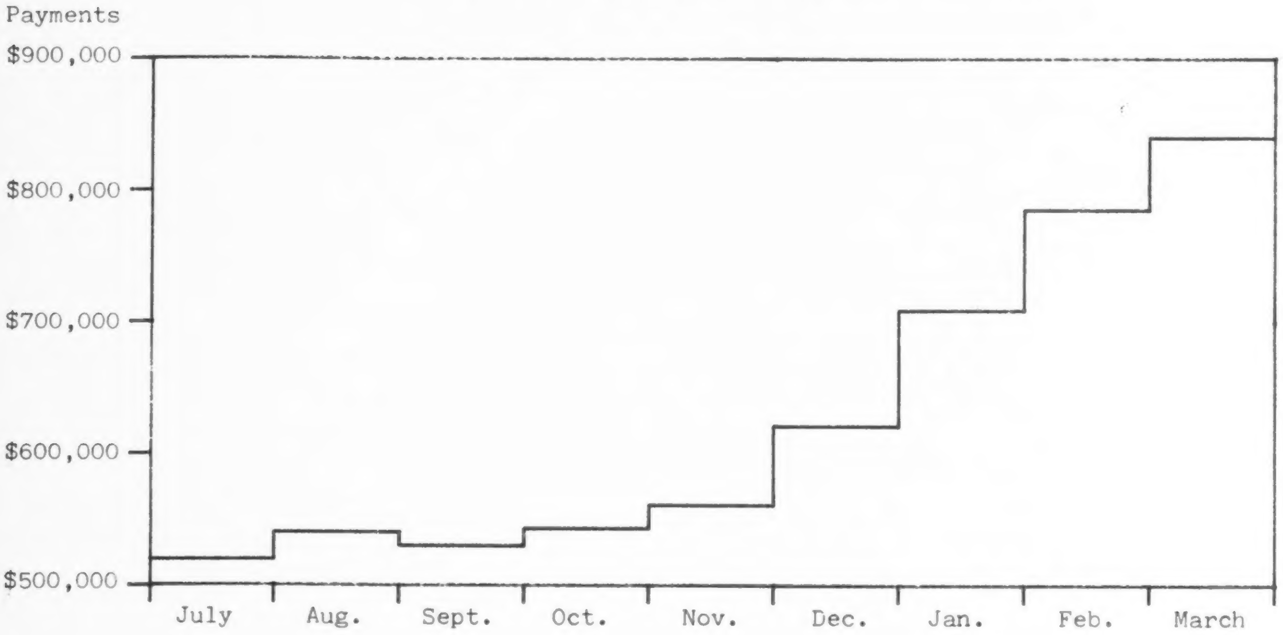
The unemployed parent segment showed marked increases both in terms of payments and cases from July, 1979 through March, 1980; September was the only month that reflected a decline. Payments for March, 1980 were $55,173 (7.0%) higher and cases increased by 117 (6.2%) above the comparable figures for February, 1980. Compared with March, 1979, costs rose $254,524 (43.4%) with 512 (34.1%) additional cases. The charts on page 4 display the rise in payments and cases for the unemployed parent segment during fiscal year 1980.

AFDC RECIPIENTS IN MINNESOTA
AT QUARTERLY INTERVALS*
JANUARY, 1976 THROUGH JANUARY, 1980

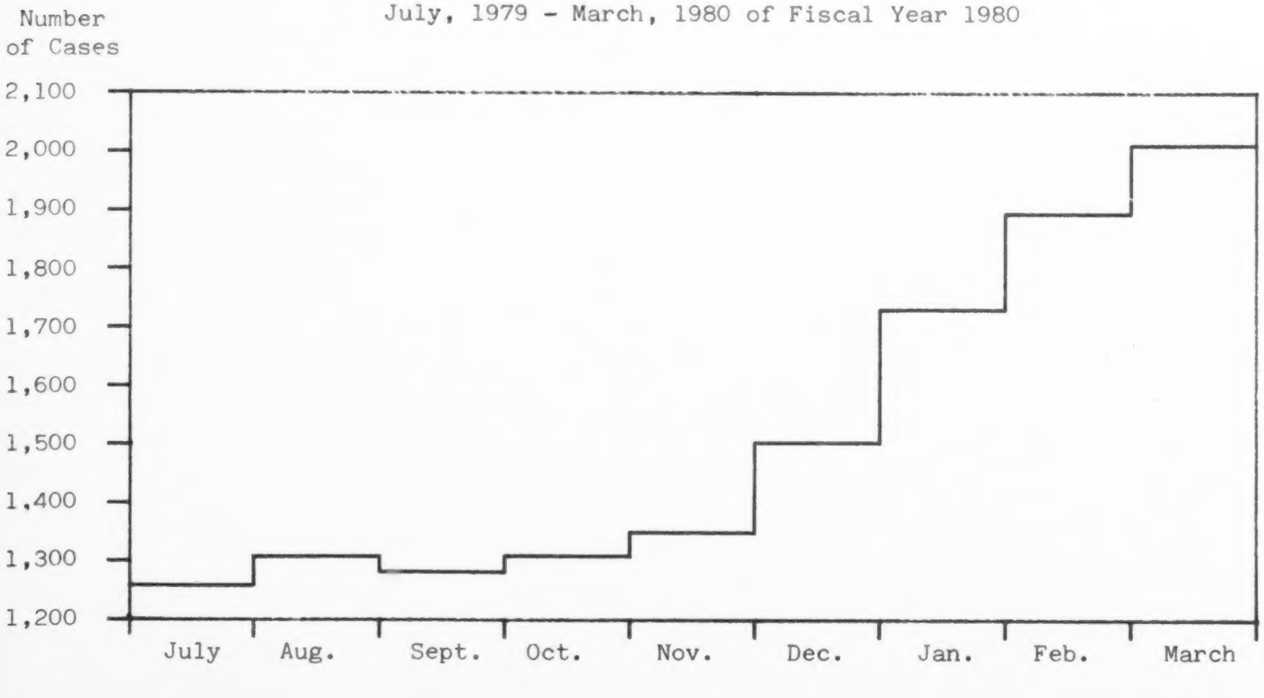


* Quarterly intervals = first month in each quarter.

Unemployed Parent Net Payments by Month
July, 1979 - March, 1980 of Fiscal Year 1980



Unemployed Parent Cases Receiving Payment by Month
July, 1979 - March, 1980 of Fiscal Year 1980



AFDC openings numbered 2,848, 82 (2.8%) below February, 1980. Closings increased to 2,545, 138 (5.7%) higher than the previous month. For every case closed, 1.12 cases were opened.

Emergency Assistance (EA) - This assistance program declined in all major categories - cases, recipients, and payments during March. This change was the direct result of a lower non-AFDC case load. Non-AFDC families were 70 (13.0%) fewer than in February, while the AFDC segment remained relatively stable. Cases numbered 1,152, 71 (5.8%) below the previous month.

EA recipients numbered 3,948 in March, 204 (4.9%) fewer than February and 104 (2.6%) below March, 1979. Again, non-AFDC recipients were in the majority and represented 51.7% of those receiving assistance. They were more numerous because of their larger family size. The average size per non-AFDC family during March was 3.78 compared to 3.11 for AFDC families.

March's expenditure was $295,122, a decline of $24,429 (7.6%) from February, but $4,685 (1.6%) above March, 1979.

The most common emergencies during the month were Eviction from Shelter, Emergency Fuel Assistance, and No Employment. Together, they represented 48.0% of March's payments.

Emergency fuel assistance totalled $35,480, an increase of $947 (2.7%) from February.

Since the inclusion of Emergency Fuel Assistance within the EA Program in October, 1979, $240,868 has been expended for fuel by the county agencies. This expenditure represents 12.8% of the EA payments within this six-month period.

Emergency Fuel Assistance by Month

	Families	Recipients	Expenditures
October, 1979	167	630	$ 43,910
November	241	959	54,635
December	198	765	43,599
January, 1980	143	560	28,711
February	151	572	34,533
March	142	560	35,480
Total	1,042	4,046	$240,868

Medical Assistance (MA) - Expenditures for March totalled $45,885,187 and 133,312 recipients for an average $344.19. This reflects an expenditure increase of $3,282,394 (7.7%) from the previous month while the recipient count increased by 17,212 (14.8%).

The average monthly fiscal year-to-date expenditure was $45,881,264, only $3,923 less than the March expenditure.

The average monthly fiscal year-to-date recipient count was 120,042, which was 13,270 less than the March count.

Most of the recipient increase occurred in the AFDC category. There were 57,522 AFDC recipients that utilized MA services during February; however, during March, the count soared to 69,737, an increase of 12,215 (21.2%). The other categories reflected only minor increases.

The major reason the recipient count increased during March was because there was an unusually large number of invoices carried over from previous months. Whenever this happens, the likelihood that the old invoices reflect different recipients, compared to the new invoices that are processed and approved immediately, increases. The increased recipient count verifies this.

Minnesota Supplemental Aid (MSA) - Expenditures for March totalled $851,846 for 10,720 recipients, an average of $79.46. The expenditure reflects a decrease of $3,307 (0.4%) from the previous month and the recipient count increased by 23 (0.2%).

The Aged expenditure totalled $209,232 for 3,348 recipients for an average of $62.49. The expenditure increased by $7,890 (3.9%) and the recipient count decreased by 2 (0.1%).

The Blind expenditure totalled $13,284 for 166 recipients for an average of $80.02. The expenditure decreased by $522 (3.8%) from the previous month and the recipient count increased by 4 (2.5%).

The Disabled expenditure totalled $629,331 for 7,206 recipients for an average of $87.33. The expenditure decreased by $10,672 (1.7%) and the recipient count increased by 20 (0.3%).

General Assistance (GA) - During March, 14,158 persons were served by this assistance program. This number represented an increase of 340 (2.5%) from February and was 1,608 (12.8%) above March, 1979. The February to March change was caused by an increase in single recipients. These recipients totalled 11,562 during the month or 343 (4.2%) more than February. The urban counties accounted for 88% of this change. The urban county experiencing the greatest change was St. Louis, whose single recipients increased 137 (13.2%) from February.

The number of cases totalled 12,456 in March, 368 (3.0%) more than February and 1,482 (13.5%) more than one year ago. This is the highest number of cases since April, 1978.

Expenditures totalled $1,945,906. This is $73,503 (3.9%) higher than reported in February and $282,669 (17.0%) more than March of 1979.

There were 4,448 applications received in March, 16 (0.4%) fewer than February. Of the 4,894 applications on hand, 4,084 (83.4%) were approved. Cases eligible for assistance numbered 14,593 or 547 (3.9%) more than the previous month. Approximately 86% of these eligibles received assistance. Closings during the month totalled 3,567 and represented an increase of 358 (10.0%) from February.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $17,871 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/ Osteopathic Service, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 31

GLOSSARY 32

Protective Payments
During March of Four Selected Years
1977 - 1980

Protective money payments are payments made to someone other than the recipient caretaker. This action is taken when evidence exists that payments to the caretaker have not been or are not currently used in the best interest of the child(ren). These situations may include the following:

- -- Continued inability to plan the use of income to meet necessary expenditures.
- -- Continued observation that children are not properly fed or clothed.
- -- Continued failure to meet obligations for rent, utilities, food and other essentials.
- -- Repeated evictions or incurrence of debts.
- -- Hospitalization of the caretaker may require vendor or protective payments to meet current financial obligations.
- -- Sanctions for refusal to participate in the Work Program.

Protective payments during March of four consecutive years, 1977 through 1980, are shown on page 2. In this interval, the number of protective cases increased by 251 (79.9%), from 314 to 565. Payments rose at a higher rate, advancing $85,371 (86.7%), from $98,447 in March of 1977 to $183,818 in March, 1980. In March, 1977, the county agencies indicated that 240 caretakers were in protective payment situations. By March, 1980, caretakers numbered 380, an increase of 140 (58.3%).

This information suggests that the size of protective payment cases is decreasing over time. This can be observed by noting the average number of children per case for these comparative months. In March, 1977, there were 2.43 children per case. This declined to 2.30 in 1978, 2.24 in 1979 and 2.02 in 1980.

Protective/vendor payments for money mismanagement are limited by policy. They cannot exceed 10% of the AFDC recipients in the county.

In situations where financial mismanagement is present, the county agencies make a special effort to develop the recipients' ability to manage money. A review is made every three months or more regularly if warranted by circumstances. When the caretaker is considered able to manage funds in the best interest of the child, protective payments are curtailed and the case returned to money payment status.

The reporting of protective payments has become more thorough over the past four years. In the last quarter of C.Y. 1979, computer-generated information became available and now serves to verify the accuracy of county entries. Two of the largest urban counties, Ramsey and St. Louis, give indications that system-generated totals for protective payments are not accurate. Therefore, even 1980 information should be used cautiously and cannot be treated as precise.

A listing of situations resulting in protective payments, the duration of these sanctions, and the designated payee is shown on page 3.

Protective Money Payments

March, 1977	Cases	Caretakers	Children	Persons	Payments
Urban	226	177	566	743	$76,452.70
Suburban	30	23	66	89	7,661.00
Rural	58	40	131	171	14,333.00
Total	314	240	763	1,003	$98,446.70

March, 1978	Cases	Caretakers	Children	Persons	Payments
Urban	248	183	578	761	$ 89,825.21
Suburban	41	25	111	136	12,580.00
Rural	62	46	120	166	14,127.00
Total	351	254	809	1,063	$116,532.21

March, 1979	Cases	Caretakers	Children	Persons	Payments
Urban	376	368	881	1,249	$142,206.17

Total	465	419	1,043	1,462	$165,425.09

March, 1980	Cases	Caretakers	Children	Persons	Payments
Urban	366	277	786	1,063	$129,937.00
Suburban	60	30	124	154	15,301.00
Rural	139	73	233	306	38,580.00
Total	565	380	1,143	1,523	$183,818.00

Protective/Vendor Payment Guidelines*

Client Action Necessitating P/V Payments	Maximum Duration	Remove Individual From Grant	Payee
Money Mismanagement	2 years	No	P/V
Not Supplying Social Security Number Adult	until compliance	Yes	Caretaker
IV-D Non-Cooperation	until compliance	Yes	P/V
Caretaker hospitalized (client request)	3 months	No	P/V
WIN SANCTIONS			
Refusal to Register (mother or child)	until compliance	Yes	Caretaker
Refusal to Register (father - UF)	until compliance	family ineligible	None
Failure to show for appraisal (if appraisal not completed at time of registration)	Minimum 90 days, then until compliance	Yes	P/V
60-day counseling period	60 days	No	P/V
Non-Participation after 60 days (caretaker)	Minimum 90 days, then until compliance	Yes	P/V
Non-Participation after 60 days (child)	Minimum 90 days, then until compliance	Yes	Caretaker
Deregistration UF at any stage of WIN	Minimum 90 days, then until compliance	family ineligible	None

None of the above sanctions are effective until the written request from Social Services, IV-D Unit, or WIN/SAU Unit is in the case record.

*As found in the Minnesota Department of Public Welfare AFDC Program Manual, November 7, 1977.

April, 1980 - In Summary

All Programs - Persons receiving aid in April, 1980 declined as a result of fewer persons receiving medical allowances. Fewer aged and disabled persons account primarily for the trend, with the General Assistance Program also recording a drop. The AFDC Program recorded an increase in April with 49,843 families aided, which is a record for this program.

Total persons aided in April, 1980 were 211,287, 2,949 (1.4%) below March, 1980, but still 10,582 (5.3%) above April, 1979. The AFDC Program and Medical Assistance account for most of the annual trend, with AFDC showing 6,276 more persons aided this year.

Expenditures increased in April, 1980 despite the decline in persons aided. Medical allowances account for the increase as retroactive rate adjustments for nursing home recipients more than offset the decline of total persons receiving MA allowances. April, 1980 expenditures were $66,265,772, $2,831,270 (4.4%) above the previous month, and $13,481,952 (25.5%) over April, 1979.

Aid to Families with Dependent Children (AFDC) - In April, this program served 134,710 recipients, 410 (0.3%) more than March. The unemployed parent category was the factor behind this change, increasing by 578 (6.7%) from the previous month. The other AFDC categories displayed a mixed pattern, but remained relatively stable. April's recipient total was 6,276 (4.9%) higher than April, 1979. The major factor in the annual pattern was the unemployed parent category, which increased by 2,964 (4.8%) compared to one year ago.

Cases totalled 49,843 during April, 266 (0.5%) above March and 2,663 (5.6%) more than one year ago. The number of families aided is a record for the AFDC Program.

Maintenance payments were $14,523,557, an increase of $67,116 (0.5%) above March, 1980 and $1,705,465 (13.3%) greater than April, 1979. Special Supplements accounted for approximately one-third of the March to April expenditure increase. This was primarily for the replacement of essential household furnishings or major appliances.

Fuel Assistance payments totalled $109,197. This is $56,639 (107.8%) above March and most likely represents a cleaning up of the outstanding bills for heating fuel. The following table shows the emergency fuel payments since October, 1979:

AFDC Emergency Fuel Assistance
October, 1979 through April, 1980

Month		Payment
October, 1979		$127,083.00
November		113,143.02
December		68,265.57
January, 1980		88,401.65
February		60,864.79
March		52,557.92
April		109,196.81
	Total	$619,512.76

Child Support (Title IV-D refunds) totalled $1,458,871 during April, a decline of $61,174 (4.0%) from March. These reimbursements represented 9.1% of AFDC expenditures during the month.

There were 3,151 applications received during April, 1980, 2.5% more than March. Of the 3,619 applications on hand, 3,175 were disposed of, 2,618 by approvals, 217 through transfer and 340 by denial. Approximately 51,200 cases were eligible to receive payment during April. Of this number, all but 1,373 received assistance. Closings numbered 2,768 during the month, 223 (8.8%) more than March.

Emergency Assistance (EA) - This program displayed a mixed pattern during April. Recipients and cases both declined while expenditures recorded a mild increase. There were 3,785 recipients served by Emergency Assistance. This is 163 (4.1%) fewer than March and 1,389 (26.8%) lower than one year ago.

Cases totalled 1,126 or 26 (3.8%) below March. By contrast, EA in April, 1979 served 1,510 families, 25.4% more.

This program cost $298,815 during April. This was $3,693 (1.3%) more than March and $124,085 (29.3%) below one year ago.

April's emergency fuel assistance totalled $32,688, a decline of $2,792 (7.9%) from March.

Since the inclusion of emergency fuel assistance within the EA Program in October, 1979, $273,556 has been expended for fuel by the county agencies. This expenditure represents 12.5% of the EA payments within this seven-month period.

Emergency Fuel Assistance
by Month

Month	Families	Recipients	Expenditures
October, 1979	167	630	$ 43,910
November	241	959	54,635
December	198	765	43,599
January, 1980	144	560	28,711
February	151	572	34,533
March	142	560	35,480
April	114	449	32,688
Total	1,157	4,495	$273,556

Medical Assistance (MA) - Expenditures for April totalled $48,711,360 on behalf of 125,223 recipients for an average of $389.00.

The following table shows how the MA activity for April compares with the previous year and the average monthly fiscal year-to-date data:

	April, 1980	April, 1979	Average Monthly July, 1979 - March, 1980
Expenditure	$48,711,360	$37,275,803	$45,881,264
MA Recipients	$ 125,223	$ 122,329	$ 120,042
MA Eligibles	$ 210,036	$ 200,540	$ 203,704

The April expenditure increased by $2,826,173 (5.8%) from March despite a recipient count decline of 8,089 (6.1%). The quantity and composition of the invoices processed accounted for this. There were 791,152 claims processed for payment during March compared to 944,886 during April, a 19.4% increase. Of these claims, 450,510 were new (initial) claims for March compared to 583,079 for April, a 29.4% increase.

During March, 596,871 claims were approved for payment--compared to 528,851 during April. Even though there were fewer claims approved during April, 11.4% fewer than March, the nursing home claims approved actually increased in number. Since nursing home claims reflected $497.76 per approved claim for April, this single factor caused MA expenditures to increase without significantly affecting the recipient count overall. March nursing home expenditures were for February (29 days) and April nursing home expenditures were for March (31 days). The additional two days accounted for most of the increase.

The April recipient count declined from March mainly because there were 11.4% fewer claims processed for payment during April.

The following table shows how many claims were approved for March and April within designated categories:

	Claims Approved by Service Type	
Provider Type	March, 1980	April, 1980
Physician	125,125	104,905
Dentist	19,947	18,136
Nursing Home	58,666	66,765
Inpatient Hospital	8,692	6,079
Outpatient Hospital	32,054	21,227
Pharmacy	304,350	263,886
Vision Care	5,414	5,928
Other	42,623	41,925
Total	596,871	528,851

Minnesota Supplemental Aid (MSA) - Expenditures for April totalled $833,204 for 10,644 recipients, an average of $78.28. The expenditure decreased by $18,642 (2.2%) from March, but was $27,254 (3.4%) greater than the monthly average for July, 1979 through March, 1980. The recipient count decreased by 76 (0.7%) from March and was 104 (1.0%) less than the monthly average for July, 1979 through March, 1980.

The total gross expenditures for March and April were $920,062 and $923,704 respectively; however, the refunds and cancellations were $68,216 and $90,500. Therefore, the net expenditure for April was affected mainly by the increased refunds and cancellations.

General Assistance (GA) - In April, 13,668 people received aid under this program. This was 490 (3.5%) fewer than the previous month and 1,904 (16.2%) more than April, 1979.

The decline between March and April is a regular phenomenon in Minnesota. As winter abates, employment opportunities improve and recipient numbers fall. During the five-year period of fiscal years 1975-1979, April has had a lower seasonal case average than March (1.05 compared to 1.09). By comparison, an average month has a value of 1.00.

There were 12,128 cases in April, 328 (2.6%) fewer than March and 1,877 (18.3%) above one year ago. Expenditures like the other indicators also declined, but to a lesser degree. This is attributable to the "Families with Children" category whose need and subsequent payments averaged $73.47 per person in April, $6.21 (9.2%) higher than March.

During April, 4,648 families applied for assistance, 199 (4.5%) more than March. This is unusual since April's application activity is typically lower than March. In the period 1975-1980, only April, 1975 and April, 1980 displayed this pattern. Of the 5,137 applications on hand, 4,271 (83.1%) were approved. There were 14,924 eligible cases in April, 330 (2.3%) more than the previous month. Approximately 75% of these eligibles received assistance. Closings during the month totalled 4,177 and represented an increase of 232 (5.9%) from March.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $17,248 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

GLOSSARY . . . 35

AFDC Deprivation of Care and Support

Two prior editions of this publication, May, 1979 and April, 1978, reviewed current AFDC characteristic studies and focused on the deprivation factor in these cases. During that period, the major factor causing the need for financial assistance was the divorced or legally separated situation. It was noted in these publications that unmarried mother cases, the second place category, were displaying the greatest rate of growth. Also, it was stated that if the trend continued, these situations would be the primary deprivation factor in the early 1980s.

Data is available for Calendar Year 1979 to update this series. This data shows that the growth of unmarried mother cases continues. In 1979, unmarried mothers accounted for 38.6% of the case load compared to 36.4% in 1978, 34.7% in 1977, and 27.6% in 1974.

Families Receiving AFDC by Deprivation Factor
Calendar Year 1979

(Excluding Foster Care and Emergency Assistance)

Deprivation Factor	Number of Families Per Month	% of Total
Death or Incapacity	1,226	2.6%
Unemployed Father	1,364	2.9
Absence	(44,992)	(94.6)
Unmarried Mother	18,367	38.6
Divorced or Legally Separated	21,007	44.1
Other Absence	5,618	11.8
Total	47,582	100.0%

The trend in total families receiving assistance continues to advance. The 47,582 families aided per month in 1979 is 1,977 (4.3%) above 1978. Unwed mother situations were primarily responsible for this increase, growing by 1,744 (10.5%). This is noted in the following table.

Minnesota
Aid to Families with Dependent Children
Estimated* Number of Families by Deprivation Factor
Calendar Years 1974-1979
(Excludes Foster Care and Emergency Assistance)

Deprivation Factor	Calendar Year 1974	1975	1976	1977	1978	1979	Change 1979 from 1978 #	%
Death and Incapacity	2,113	2,006	1,861	1,579	1,413	1,226	- 187	-19.1%
Unemployed Parent	1,003	1,034	1,399	1,617	1,419	1,364	- 55	- 4.0%
Absence:								
Unmarried Mother	10,724	13,150	13,633	15,593	16,623	18,367	+1,744	+10.5%
Divorced or Legally Separated	18,246	19,435	19,624	20,684	20,810	21,007	+ 197	+ 0.9%
Other Absence	6,783	5,620	6,097	5,454	5,340	5,618	+ 278	+ 5.2%
Total	38,869	41,245	42,614	44,927	45,605	47,582	+1,977	+ 4.3%

*This number is estimated from the sample used for the Quality Control Program. The exception is for Unemployed Father families which is the actual case load, and for Unmarried Mother families in 1978 which was taken from the Central Information File.

The findings of the latest AFDC Characteristic Study covering the October, 1979 to March, 1980 period have been distributed. It indicates that Unmarried Mother situations now predominate, confirming the prediction of 1978. This latest random sample of AFDC cases indicated that 44.3% of the cases now contained unmarried mothers, while 42.5% received assistance because of divorce or legal separation. The following table shows the basis of eligibility at intervals since 1976. The growth of the unmarried group can easily be seen. The number of unmarried mothers will continue to advance due to the tendency of unwed mothers to keep their infants.

Deprivation Factor
Basis for AFDC Eligibility

	Oct.-March, 1980	April-Sept., 1979	Oct.-March, 1979	July-Sept., 1978	Jan.-June, 1978	July-Dec., 1977	Jan.-June, 1977	July-Dec., 1976	Jan.-June, 1976

May, 1980 - In Summary

All Programs - Little change occurred in total persons aided in May, 1980. The total of 210,977 was 310 (-0.1%) under April, with fewer aged persons receiving medical allowances accounting for the trend. But this was partially offset by a continued upward trend in AFDC persons, with the Unemployed Parent case load accounting for most of this trend. The AFDC case load (families) is over 50,000 (at 50,147) for the first time.

The annual trend shows a 12,589 person increase, or a rate of 6.3%. This is the highest rate recorded this year and is due primarily to the AFDC program trend in Unemployed Parent families and Unmarried Mothers. The General Assistance and Medical Assistance programs also contributed to the trend.

Total costs were $64,876,282 in May, $1,389,490 (-2.1%) below April, but $12,165,229 (+23.1%) above May, 1979. Nursing home costs account for the monthly trend and most of the annual trend. All programs contributed to the 23.1% upward trend over the year.

Aid to Families with Dependent Children (AFDC) - Net payments reached an all-time high of $14,990,455, rising $466,898 (3.2%) above April, 1980 and $2,093,242 (16.2%) above May, 1979. Cases receiving payment exceeded the 50,000 mark for the first time in history. Paid cases numbered 50,147, an increase of 304 (0.6%) over the previous month and 2,987 (6.3%) higher than May one year ago. Payments rose at a higher percentage rate than cases as a result of a $330,683 reduction in support collections. The continued rise in the AFDC costs and cases is contrary to previous trends. Normally, May begins to reflect a decline which continues through the summer. This was conspicuously absent and is reflective of the deepening recession. The rural counties reported a higher case increase with 160 (1.5%) additional cases compared to 144 (0.6%) more for the SMSA counties. Unemployed Parent cases increased by 129 (6.0%), Regular cases rose by 188 (0.4%), and Foster Care in Family Homes reflected a slight rise of eight cases (0.7%). The reverse was true for Institutional Foster Care, Unborn Only, and Unborn Concurrent, whose case counts declined slightly.

AFDC Cases and Payments
May Change from April - 1975 to 1980

	May Change from April			
	Cases		Payments	
May	#	%	$	%
1980	304	0.6%	$466,898	3.2%
1979	- 20	-0.1%	$ 79,121	0.6%
1978	-414	-0.9%	-$513,155	- 4.0%
1977	-392	-1.6%	-$784,266	-12.0%
1976	-634	-1.4%	$ 23,973	0.2%
1975	633	1.4%	-$104,891	- 0.9%

AFDC School-Age Children

The table below indicates the number of school-age children 5 to 17 years of age on the AFDC program for a three-year period, from December, 1977 to December, 1980. This data was taken from the Welfare Information System for all active AFDC cases. Projections were made for June, September, and December, 1980.

As can be observed, the number of children between 5 and 17 years reached its lowest level in June of 1979 and is now increasing. This trend is expected to continue through the balance of 1980.

It should be noted that the number of AFDC children per case has been declining over time, the result of more Unmarried Mother cases and fewer Divorced or Separated ones. The size of the average AFDC family can be expected to decline further. The current practice of unwed mothers to raise their children will perpetuate this trend.

Trends in AFDC Child Recipients*
Children 5 - 17 Years

	Number of Children
December, 1977	60,529

AFDC Recipient Rate
Per 1,000 Population
in Minnesota and the United States

The table and graph that follow portray the AFDC recipient rate per 1,000 population in Minnesota and the United States for the 20-year period from 1960 through 1979. Although both display a similar growth pattern, it can be observed that Minnesota's rate is considerably lower than the national average.

The composition of Minnesota's population is the major factor in a low AFDC dependency rate. This is because our state does not possess a high proportion of any minority group. Minority groups, particularly blacks, generate higher AFDC dependency rates than the population at large.

AFDC Recipient Rate
Per 1,000 Population

Year	U.S. Rate* (July 1)	Minnesota Rate* (June)
1960	34.7	21
1961	38.0	22
1962	40.8	23
1963	41.5	25
1964	43.6	28
1965	45.2	29
1966	46.1	31
1967	51.0	32
1968	57.3	36
1969	66.6	38
1970	82.9	48
1971	101.2	60
1972	108.1	67

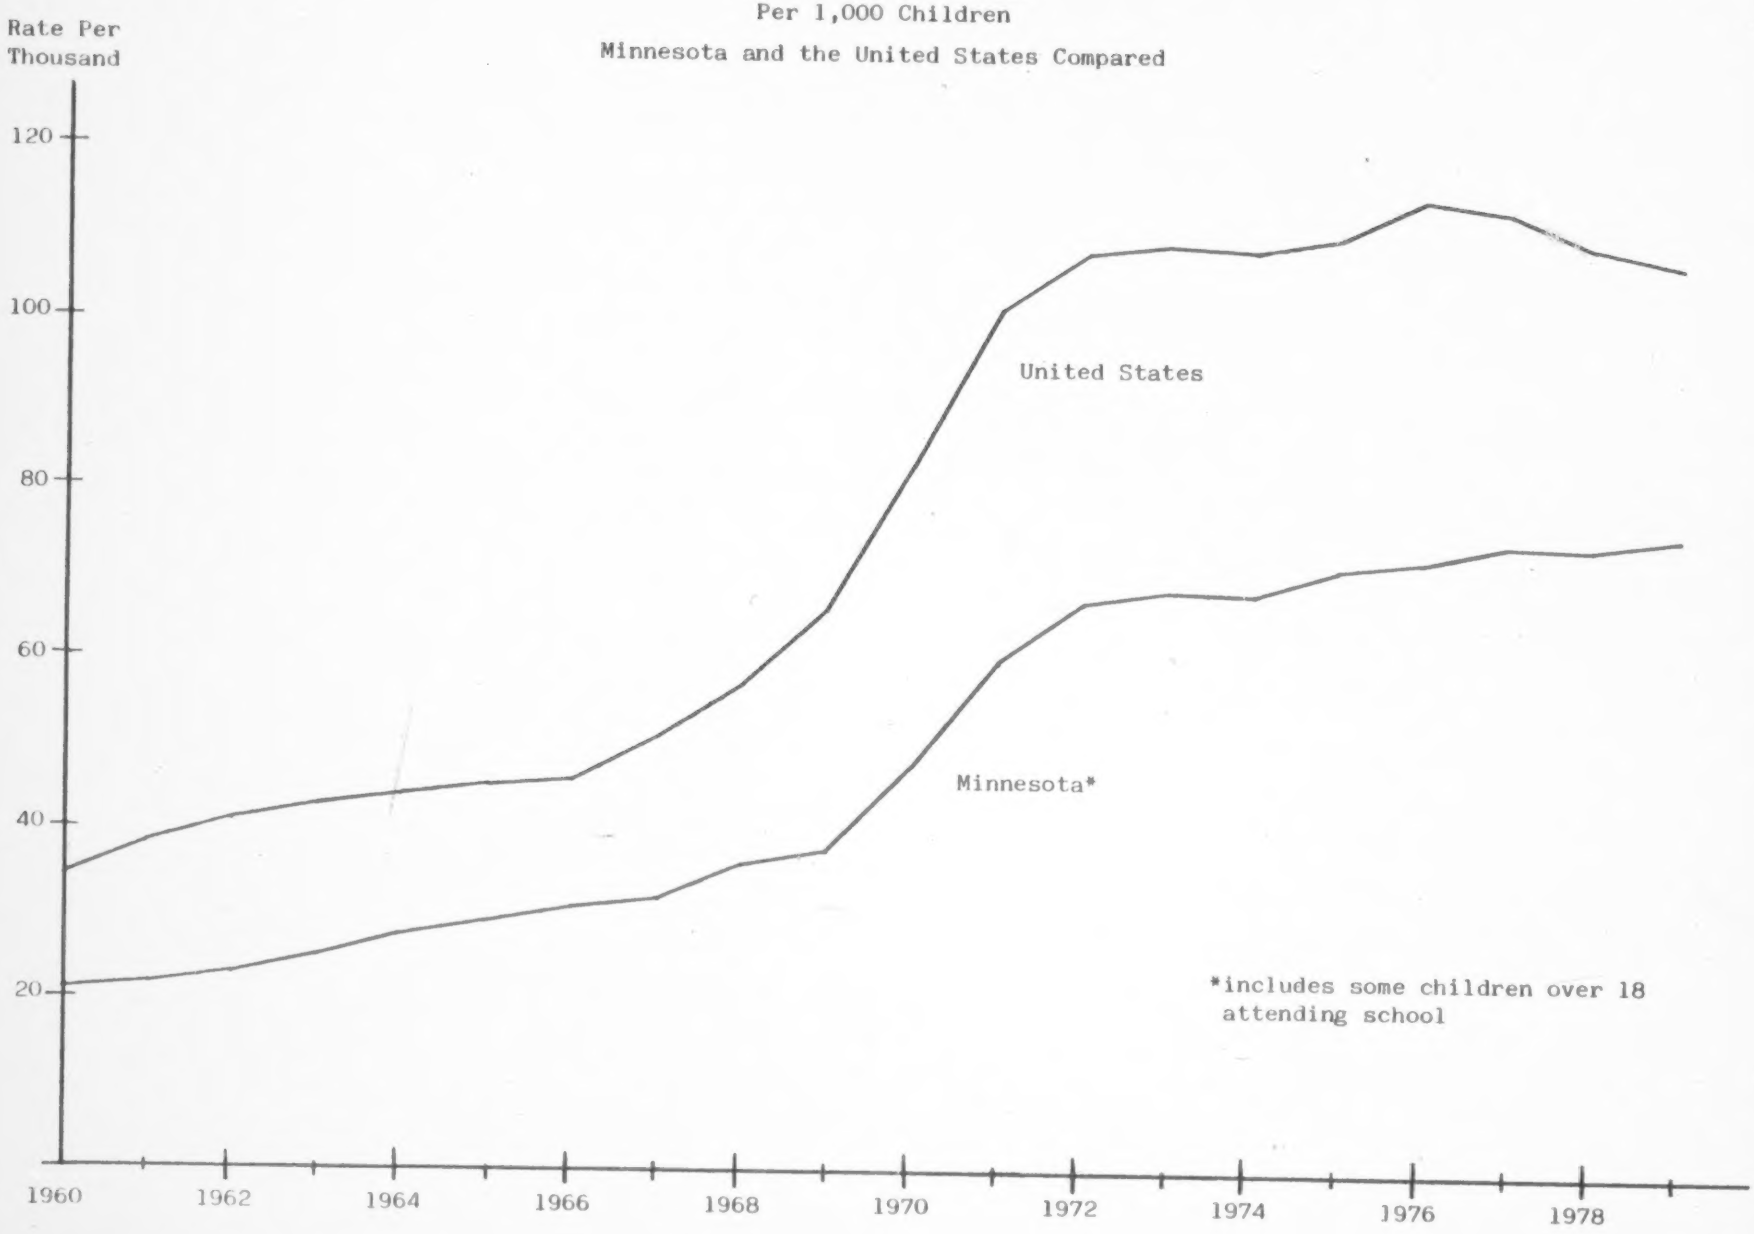
*Includes some children over 18 years of age attending school.

AFDC Recipient Rates
Per 1,000 Children

Minnesota and the United States Compared



*includes some children over 18 attending school

Emergency Assistance (EA) - This assistance program displayed a marked recipient increase accompanied by higher costs during May. Recipients numbered 4,445 and represent an increase of 660 (17.4%) from April. This is 296 (7.1%) higher than May, 1979.

The recipient increase during May is the result of higher numbers of non-AFDC families seeking assistance for Emergency Fuel and Utilities.

There were 1,283 families receiving assistance in May. This is 162 (14.4%) more than April and 89 (7.4%) higher than the previous year.

May's expenditure was $376,685, an increase of $77,870 (26.1%) from April and 72,975 (24%) above May, 1979.

The major categories of change in May, Utilities, Emergency Fuel, and Other, are shown below:

	Utilities	Emergency Fuel	Other
May, 1980	$53,585	$60,344	$64,426
April, 1980	28,718	32,688	38,765
Change	$24,867	$27,656	$25,661
Percentage	86.6%	34.6%	66.2%

The Other category contains a number of emergency situations including moving expenses, repair or replacement of furnace, water heater, appliances, plumbing and roof. Also, payments for food, shelter, stolen cash, battered women, etc. are included here. Two categories, Stolen Cash and Battered Women, are shown in the table below. Together, they total $24,767.85 and represent 38.4% of the Other category.

Battered Women
May, 1980

County	Families	Persons	Expenditures
Beltrami	3	9	$ 1,033.00
Cass	1	2	616.00
Crow Wing	3	10	2,058.65
Dakota	12	39	10,475.00
Douglas	1	4	321.00
Freeborn	1	3	21.72
Kandiyohi	2	5	2,209.00
Total	23	72	$16,734.37

Lost Cash
May, 1980

County	Families	Persons	Expenditures
Beltrami	2	7	$ 407.00
Carlton	1	2	80.00
Cass	1	2	58.00
Dakota	3	10	270.93
Hennepin	33	91	6,578.10
Meeker	1	4	113.75
Mille Lacs	1	4	42.95
Olmsted	1	3	355.94
St. Louis	3	9	126.81
Total	46	132	$7,906.67

The most frequent emergencies during the month were eviction from shelter, emergency fuel and utilities. Together, they represented 53.6% of May's payments.

Since the inclusion of emergency fuel assistance within this assistance program, $333,900 has been spent for fuel by the county agencies. This represents 13.0% of the EA payments in this eight-month period.

Emergency Fuel Assistance by Month

Month	Families	Persons	Expenditures
October, 1979	167	630	$ 43,910
November	241	959	54,635
December	198	765	43,599
January, 1980	144	560	28,711
February	151	572	34,533
March	142	560	35,480
April	114	449	32,688
May	197	742	60,344
Total	1,354	5,237	$333,900

Medical Assistance (MA) - MA expenditures for May totalled $46,771,608 for 123,096 recipients, an average of $379.96 per recipient. Expenditures decreased $1,939,752 (4.0%) from the previous month, but increased $11,493,158 (30.9%) from one year ago. The recipient count decreased by 2,127 (1.7%) from the previous month, but increased by 7,713 (6.7%) from one year ago. The average grant decreased by $9.04 (2.3%) from the previous month, but increased by $57.40 (17.8%) from one year ago.

During May, the recipient utilization was 58.4%. The following table outlines the utilization rates for May, 1980:

Eligibility Category	Recipients	Eligibles	Utilization Rate
OAA-SSI	8,448	11,706	72.1%
AB-SSI	296	404	73.3%
AD-SSI	12,503	15,630	80.0%
AFDC	63,963	137,626	46.5%
OAA-MAO	22,540	26,441	85.2%
AB-MAO	118	132	89.4%
AD-MAO	7,035	7,826	89.9%
AFDC/Related	1,238	1,974	62.7%
Needy Children	6,955	8,983	77.4%
Total	123,096	210,722	58.4%

Minnesota Supplemental Aid (MSA) - MSA payments during May totalled $836,168 for 10,616 recipients for an average grant of $78.76. The expenditure increased by $2,964 (0.4%) from the previous month and $61,362 (7.9%) from one year ago. In contrast, the recipient count decreased by 28 (0.3%) from the previous month and 211 (1.9%) from one year ago. The average grant increased by $0.48 (0.7%) from the previous month and $7.20 (10.1%) from one year ago.

The majority of MSA cases are categorized as disabled, which accounted for about three-fourths of the total MSA expenditure for May. The type of care required by the disabled recipients generally explains their higher average cost per recipient. The following table provides a breakdown of the three categories within the MSA program and the case and payment distribution relative to the total:

	Recipients	(% Total)	Payments	(% Total)	Average Grant
Aged	3,241	(30.5%)	$198,665	(23.8%)	$61.30
Blind	158	(1.5%)	$ 13,549	(1.6%)	$85.75
Disabled	7,217	(68.0%)	$623,954	(74.6%)	$86.46
Total	10,616	(100.0%)	$836,168	(100.0%)	$78.76

General Assistance (GA) - In May, this assistance program served 13,696 people. This total was one person less than April and, noting the annual trend, was 2,091 (18.0%) more than one year ago. The Families with Children category experienced the only increase during the month, rising by 100 (6.3%), while persons within the Single and Families with Adults categories declined by 84 (0.7%) and 17 (2.3%) respectively. Within the Families with Children category, the rural counties displayed the greatest change, increasing by 102 (12.2%).

There were 12,078 cases in May. This is 79 fewer than April, 1979 and 1,976 (19.6%) more than one year ago. Expenditures for May totalled $1,901,366, or $2,530 (0.1%) more than April. The major contributor to this increase was the

Single cases, whose payments at $151.99 per person averaged $1.53 (1.0%) above the previous month. Of the larger counties, St. Louis displayed the greatest change with grants averaging $158.73 per single person during May, $7.57 (5.0%) more than April.

In May, 4,209 applications were received, 439 (9.4%) below April. Of the 4,681 applications on hand during the month, 3,807 (81.3%) were approved. There were 14,645 active cases in May, 279 (1.9%) fewer than the previous month. Approximately 76% of the active case load received assistance. Closings during the month numbered 4,089 and represented a decline of 88 (2.1%) from April.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $21,885 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 35

GLOSSARY 36

AFDC Case Characteristics
October, 1979 to March, 1980

The following are AFDC case characteristics gleaned from a recent AFDC quality control sample. These random samples selected from all AFDC cases receiving money payments during a six-month period date back to 1976. They serve to isolate the components of change within the program, thereby providing perspective on this program over time. Cases excluded from this sample are: 1) those opened on presumptive eligibility; 2) those involving the death of payees or applicants; 3) AFDC foster care cases; and 4) AFDC emergency assistance cases. All statements reflect the percentage of total cases reviewed.

-- Divorce or legal separation, previously the primary reason for AFDC eligibility, declined from 46.1% in the October, 1978 to March, 1979 period to 42.5% in the October, 1979 to March, 1980 period.

-- Unwed mother cases increased from 39.3% (October, 1978 to March, 1979) to 44.3% (October, 1979 to March, 1980). This is now the most prevalent reason for AFDC eligibility.

-- Of the cases reviewed, 30.3% had a case life (received AFDC even if not continuously) of over five years. The average was two years, nine and one-half months.

-- The average number of children per AFDC family is declining. During the period October, 1979 to March, 1980, it was 1.90, whereas one year earlier, it was 2.13. The median number of children in the assistance group was 2.28 in the period from January to June, 1976.

-- The average age of the youngest child receiving AFDC is five. Approximately one-third of the families have a child between one and four, while in another third, the youngest is between the ages of six and 13.

-- WIN registration exemptions extend to approximately 55% of AFDC cases because they contain a child under the age of six.

-- Approximately 27% of the cases reviewed included mandatory WIN or WEP registrants.

-- During the six-month period October, 1979 to March, 1980, 32% of the AFDC cases showed the presence of earned income. This represents a slight increase over earlier periods.

-- Approximately 60% of the AFDC cases have some liquid assets or personal property.

-- Food stamps are used in 52% of the AFDC cases. This is a decline of 6% from the previous period and results from the change in Food Stamp Regulations in March of 1979.

June, 1980 - In Summary

All Programs - More medical claims were processed in June for all services, resulting in a $11,181,944 (+17.2%) increase in total payments. With this increase, total payments of $76,058,226 in June were $26,460,015 (+53.3%) above June, 1979. Of this annual trend, 81% represents inflation and increased utilization of high-cost services, and 19% represents more persons aided. Case load increases in all programs, except Supplemental Aid, account for the latter factor.

Persons aided, at 218,516, is at a record level for a June month, and at about the same level in the previous peak months in fiscal year 1976(1). The monthly increases of 7,539 persons (+3.6%) occurred in MA (5,475), AFDC (1,250), and GA (824). The annual increase of 20,335 (+10.3%) occurred in AFDC (8,846), MA (7,897), and GA (3,134).

Fiscal Year 1980 - In Summary - Total public assistance expenditures in fiscal year ending June 30, 1980 increased 19.2% over the previous year, which is twice the rate of increase noted in fiscal year 1979. Health care accounts for most of the trend, but maintenance costs also contributed substantially as case loads increased and assistance standards were raised to meet the cost of living. The following table presents the fiscal year costs and change from the previous year.

Type of Care	1979-80 Expenditures	Change from 1978-79 Amount	Change from 1978-79 %
Maintenance	$207,688,720	$ 20,120,252	+10.7%
Health Care	$566,368,921	$104,753,901	+22.7%
Total	$774,057,641	$124,874,153	+19.2%

Aid to Families with Dependent Children (AFDC) - In June, the AFDC program continued to advance. This is contrary to the normal trend which, in the past, has declined during May and June. Reopened cases were up 160 (11.9%) from May and 230 (18.0%) above April of 1980. New cases rose at a slower pace, rising 98 (7.2%) compared with May and 116 (8.7%) greater than April. Unemployed parent approvals climbed from 372 in April to 414 in May to 454 in June, representing an increase of 22% in this three-month period. Approvals with absent fathers showed no significant changes from previous months.

Recipients numbered 136,791 during the month. This is 1,250 (0.9%) higher than May and is 4,766 (3.6%) above the fiscal year 1980 monthly recipient average of 132,025.

June's case load totalled 50,475, an increase of 328 (0.7%) from May, and 3,448 (7.3%) higher than one year ago.

---

(1) Figures published that year were higher, but were duplicated counts.

Expenditures were $14,897,789 during the month. This represents a decline from May and is attributable to a $394,764 (35%) increase in child support collections. June's payments were $464,437 (3.2%) more than the average monthly expenditure during the fiscal year.

Applications approved in June totalled 3,182, of which 1,509 (47.4%) were reopened cases. Approvals increased 262 (9.0%) over May, 1980, and 1,060 (50.0%) above June, 1979. Total approvals for fiscal year 1980 were 35,643 or a monthly average of 2,970 cases. This compares with 31,678 approvals for fiscal year 1979, or an increase of 3,965 (12.5%) in fiscal year 1980.

June closings numbered 2,832, a decline of 169 (5.6%) below May. For every case closed in June, there were 1.12 cases opened. There were 32,597 cases closed in fiscal year 1980 for a monthly average of 2,716 cases, compared with 30,851 closings representing a monthly average of 2,571 in fiscal year 1979.

Fiscal Year 1980

AFDC expenditures for the fiscal year ending June 30, 1980 were $173,200,221. This is $16,833,210 (10.8%) above fiscal year 1979. It should be noted that this trend represents the 7.0% increase in the basic standard on July 1, and the rise in families receiving assistance which primarily was brought about by the sluggishness of the economy. The effect of the economic slowdown can be observed in the Unemployed Parent segment, which rose from 1,259 cases in July, 1979 to 2,431 cases in June, 1980, a rise of 93.1%. Approximately 70.0% of the unemployed parent applications approved in fiscal year 1980 were for loss or reduction of employment of the responsible or supporting household member. Now an aspect of the UP segment, unemployed mother situations are observed but are relatively rare. The Welfare Information File indicates that unemployed mothers comprise only 5.2% of the total UP case load.

In fiscal year 1980, support collections received totalled $15,718,988, a rise of $1,496,535 (10.5%) above such collections for fiscal year 1979. Support collections represented 8.3% of the total AFDC maintenance costs in both fiscal years 1979 and 1980.

Payments to 18 year olds during fiscal year 1980 amounted to $1,252,844, thus averaging $104,404 per month. The number of 18 year olds receiving payment averaged 1,028 monthly. The average monthly payment per person was $101.57.

A monthly average of 471 families received $901,531 for emergency fuel assistance in fiscal year 1980. The average amount received per family was $212.63. Eleven (11) counties made no payments for emergency fuel.

AFDC Caretakers Increase Faster Than Children - The annual trend in the AFDC case load shows a 7.3% increase in families, a rise of 6.9% in total persons, a 4.9% increase in children, and an 11.2% increase in caretakers. In terms of the annual increase in total persons (8,703), 4,579 represent caretakers and 4,124 children. The reason for this pattern is that most of the trend occurred in the Unemployed Parent category which includes two parents (caretakers) per family. Another reason is the continuing trend to smaller families, which has resulted in the fact that more than half of all AFDC families are now one-child families. The annual trend in the number of caretakers by subprograms in AFDC is presented in the following table:

AFDC Caretakers
by Subprogram
June, 1980

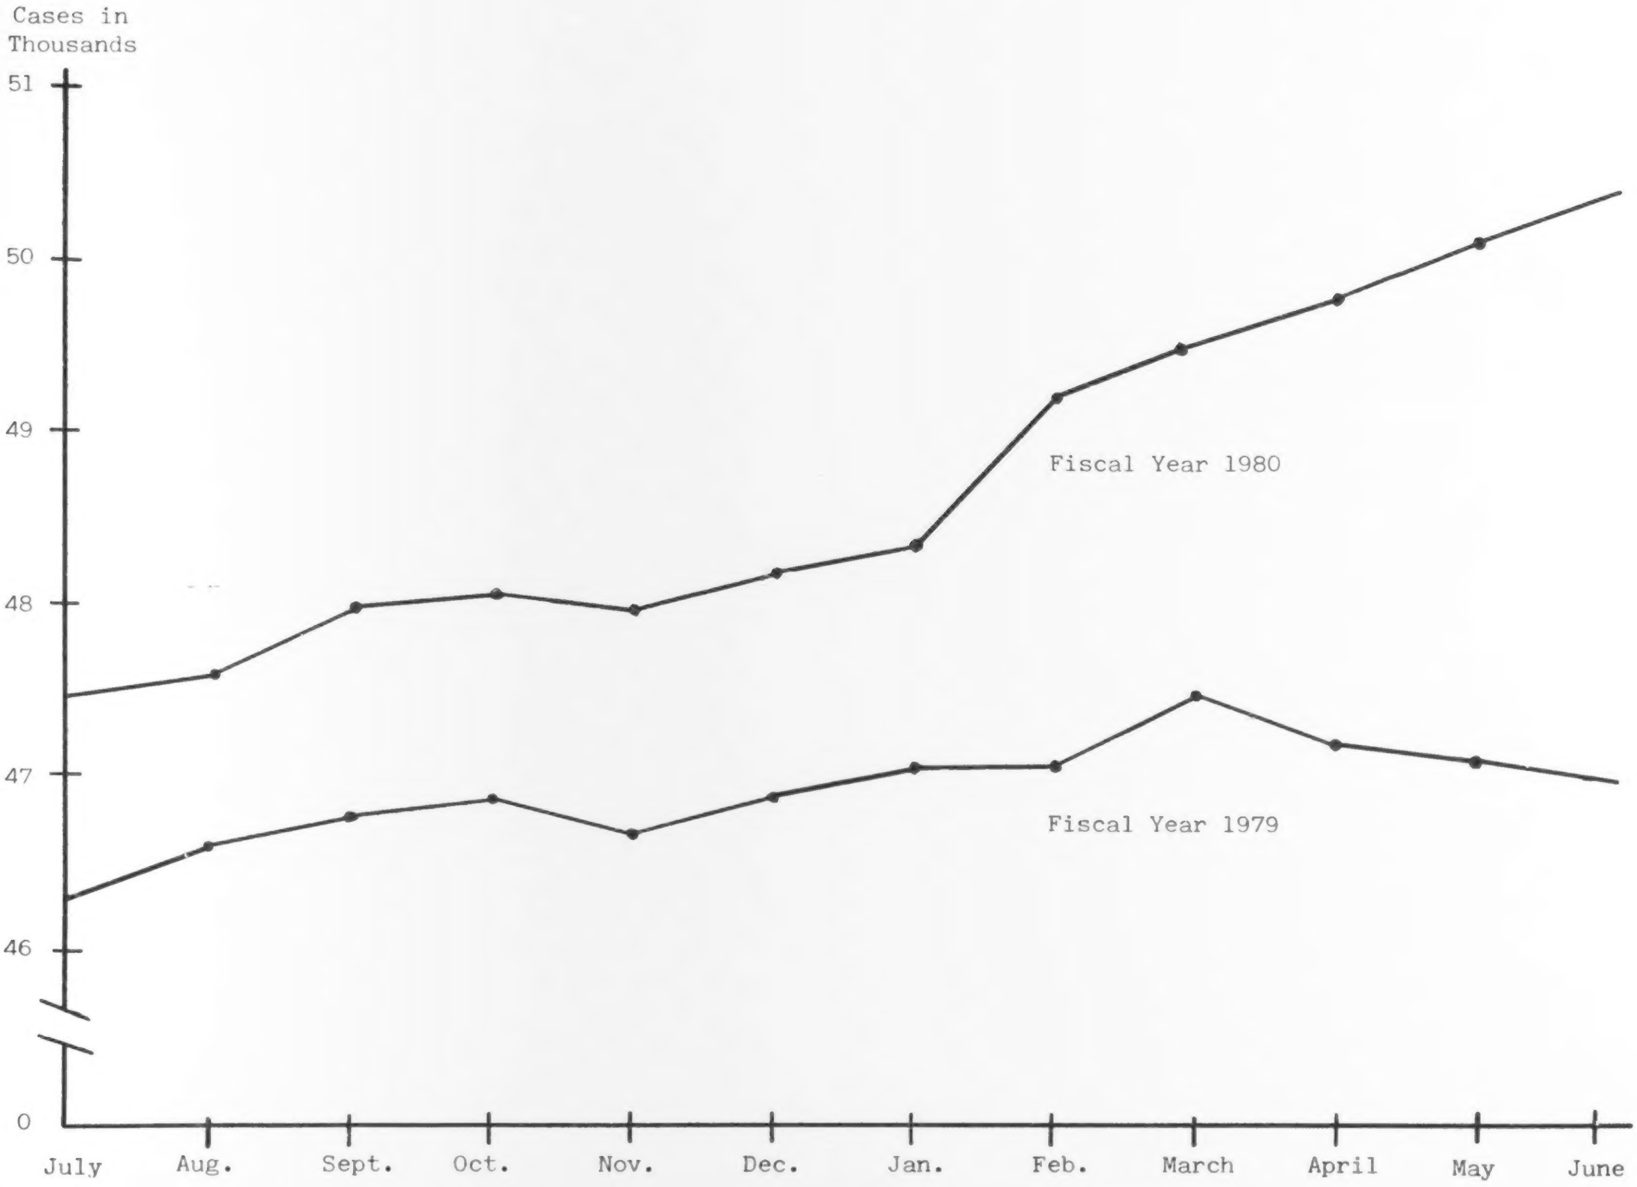
		Change from June, 1979	
	Number	Number	Percent
Total Caretakers	45,505	4,579	11.2%
Protective Money Payment	381	90	30.9
Unemployed Parents	4,857	2,327	88.5
Unborn Children	1,110	216	24.2
Regular	39,157	1,946	5.2%

Most of the annual trend in the number of caretakers occurred in the age groups 20 to 34 years of age. This is noted in the following table:

AFDC Caretakers
by Age Groups
June, 1979 and 1980

	June		
Age Group	1979	1980	Change
Under 20	2,463	2,492	+ 29
20-24	11,089	12,367	+1,278
25-29	10,363	11,674	+1,311
30-34	7,020	8,105	+1,085
35-39	4,448	4,788	+ 340
40-44	2,597	2,790	+ 193
45-49	1,421	1,530	+ 109
50 and over	1,525	1,759	+ 234
Total	40,926	45,505	+4,579
Median Age	28.33 Years	28.38 Years	

AFDC
Cases Receiving Payment by Month
Fiscal Years 1979 and 1980



Emergency Assistance (EA) - This program displayed another recipient increase during June accompanied by a leveling of costs. Recipients totalled 5,052 and represent an increase of 607 (13.7%) from May. This is 1,177 (30.4%) higher than June, 1979.

This recipient increase is the result of 564 additional AFDC persons seeking assistance.

There were 1,444 families receiving assistance in June. This is 156 (12.1%) more than May and 323 (28.8%) higher than June, 1979.

June's expenditure totalled $371,044. This represents a decline of $5,641 (1.5%) from May, but is $101,160 (37.5%) more than recorded last year.

The emergencies recording the greatest change from May are shown below.

Month	Migrant Family in Need	No Employment	Utilities	Emergency Fuel
June, 1980	$20,030	$18,569	$81,804	$37,298
May, 1980	$ 6,620	$41,485	$53,585	$60,344
Change	$13,410	-$22,916	$28,219	-$23,046
Percent of Change	202.6%	-55.2%	52.7%	-38.2%

The most frequent emergencies during the month were Eviction from Shelter, Utilities, and Emergency Fuel. Together, they represented 56.1% of June's payments.

Since Emergency Fuel payments began, $371,199 has been spent for fuel by the county agencies. This represents 9.4% of the EA payments during fiscal year 1980. These payments are shown below.

Emergency Fuel Assistance by Month

Month	Families	Persons	Payments
October, 1979	167	630	$ 43,910
November	241	959	54,635
December	198	765	43,599
January, 1980	144	560	28,711
February	151	572	34,533
March	142	560	35,480
April	114	449	32,688
May	197	742	60,344
June, 1980	132	515	37,298
Total	1,486	5,752	$371,198

Fiscal year 1980 expenditures were $3,961,418, an increase of $474,582 (13.6%) above fiscal year 1979. Also, the average monthly number of cases receiving assistance was 29 (2.3%) higher in the current fiscal year. Expenditures for the SMSA counties rose $304,339 (11.0%), whereas average monthly cases were 7 (0.7%) fewer. The rural counties reported a fiscal year payment rise of $170,242 (23.9%), with an increase of 37 (14.9%) in the average monthly number of cases receiving assistance. Primarily, the increases were the result of rises in evictions of $468,886, in utilities of $30,529, and in the implementation of the emergency fuel assistance program. The average payment per case was slightly higher (+$1.27) in the rural counties. The average number of persons per family remained at 3.4. All counties reported payments for EA in fiscal year 1980.

Medical Assistance (MA) - MA expenditures for June totalled $57,954,573 for 141,594 recipients, an average of $409.30. Compared to May, the expenditure increased by $11,182,965 (23.9%) and the recipient count increased by 18,498 (15.0%). The June expenditure was also $10,757,163 (22.8%) larger than the average monthly expenditure for fiscal year 1980, which was $47,197,410, and the recipient count for June was 19,070 (15.6%) larger than the average monthly recipient count for fiscal year 1980. Consequently, the average cost per person for June of $409.30 was $24.09 (6.3%) above the average monthly cost incurred for fiscal year 1980 of $385.21.

The expenditure for fiscal year 1980 totalled $566,368,921 with an average monthly recipient count of 122,524 recipients. The following table shows how the MA expenditure has grown over past years; it more than doubled in five years.

Fiscal Year	Total Expenditure	(% Change)
1980	$566,368,921	(+22.7%)
1979	461,615,020	(+13.3%)
1978	407,486,537	(+10.8%)
1977	367,624,575	(+14.3%)
1976	321,575,493	(+23.1%)
1975	$261,226,844	(+14.9%)

Long-term care expenditures accounted for $370,713,432 (65.5%) of the total expenditure for fiscal year 1980. This expenditure was incurred by 33,319 recipients for an average month during the fiscal year. Since there were 122,524 recipients that utilized medical services for an average month during the fiscal year, this means 27.1% of them incurred 65.5% of the total cost for long-term care alone.

The recipients that resided in long-term care facilities also incurred additional expenditures that totalled $38,878,162 for fiscal year 1980. These were ancillary services which were not included in the normal day-to-day care of long-term care facilities. For an average month during fiscal year 1980, 27,027, or 81.1%, of the long-term care recipients utilized these services.

Therefore, the long-term care recipients actually incurred $409,591,594, or 72.3%, of the total MA expenditure for fiscal year 1980; this was incurred by 27.1% of the average monthly recipients. The average monthly cost incurred by these recipients was $1,024.42.

Fiscal Year 1980

Minnesota Supplemental Aid (MSA) - MSA expenditures for June totalled $885,463 for 10,593 recipients, an average of $83.59 per grant. The expenditure increased by $49,295 (5.9%) from the previous month and by $84,048 (10.5%) from one year ago. The recipient count decreased by 23 (0.2%) from the previous month and by 321 (2.9%) from one year ago.

The expenditure for fiscal year 1980 totalled $9,808,386 and averaged $76.28 per monthly grant. The growth of the fiscal expenditures since the MSA Program was implemented is reflected in the following table.

Fiscal Year	Fiscal Year Expenditure	(% Change)	Average Monthly Grant Per Person	(% Change)
1974 (1/2 year)	$2,709,366		$44.21	
1975	5,252,641	(- 3.1%)*	50.42	(+14.0%)
1976	5,222,438	(- 0.6%)	62.54	(+24.0%)
1977	5,285,057	(+ 1.2%)	77.58	(+24.0%)
1978	6,871,337	(+30.0%)	53.58	(-32.2%)
1979	8,951,944	(+30.3%)	68.22	(+27.3%)
1980	$9,808,386	(+ 9.6%)	$76.28	(+11.8%)

*1974 expanded for comparison purposes

General Assistance (GA) - The number of persons aided by this program totalled 14,520 in June. This represents an increase of 824 (6.0%) from May and is 3,134 (27.5%) more than recorded in June of 1979. The May to June increase occurred in all categories--Single +663 (5.9%), Families with Children +69 (4.1%), and Families with Adults +92 (12.6%). Hennepin County displayed the greatest change, increasing across all categories by a total of 910 recipients, an increase of 17.7%.

There were 12,819 cases in June, 741 (6.1%) more than May and 2,875 (28.9%) above one year ago. The June increase is an anomaly since June typically has a lower case activity than May. Since the creation of the General Assistance Program in January, 1974 and discounting the early period of program growth, this is the only June that has displayed an increase.

Expenditures increased $47,991 (2.5%) from May to $1,949,357. This total is 496,956 (34.2%) more than one year ago.

The following tables compare June GA cases and expenditures with those of June, 1979 and 1978. It can be observed that the proportion of Single cases is increasing while Families with Children continues to decline.

General Assistance Recipients by Family Type
June, 1980 Compared with June, 1979 and June, 1978

	Recipients		
Category	June, 1980	June, 1979	June, 1978
Single	11,930 (82.2%)	9,247 (81.2%)	10,925 (80.3%)
Families with Children	1,765 (12.1%)	1,555 (13.7%)	1,874 (13.8%)
Families with Adults	825 (5.7%)	584 (5.1%)	803 (5.9%)
Total	14,520 (100.0%)	11,386 (100.0%)	13,602 (100.0%)

General Assistance Expenditures by Family Type
June, 1980 Compared with June, 1979 and June, 1978

Category	Expenditures June, 1980	Expenditures June, 1979	Expenditures June, 1978
Single	$1,736,138 (89.1%)	$1,296,452 (89.3%)	$1,452,773 (89.2%)
Families with Children	132,413 (6.8%)	99,031 (6.8%)	105,937 (6.5%)
Families with Adults	$ 80,806 (4.1%)	$ 56,918 (3.9%)	$ 69,808 (4.3%)
Total	$1,949,357 (100.0%)	$1,452,401 (100.0%)	$1,628,518 (100.0%)

In June, 4,807 families applied for assistance. This is 598 (14.2%) more than May. Of the 5,253 applications on hand during the month, 4,328 (82.4%) were approved. Active cases numbered 14,867 in June, 222 (1.5%) more than May. Approximately 77% of the active case load received assistance. Closings during the month totalled 3,785 and represented a decline of 304 (7.4%) from May.

Fiscal Year Comparisons

In fiscal year 1980, the General Assistance Program advanced slightly. Cases, recipients and expenditures were all above 1979 levels. Cases throughout the year were up 7,884 (6.1%), recipients increased 7,154 (4.8%), and expenditures advanced by $1,956,019 (10.4%).

These higher totals are the result of the weakening economy. With a deterioration of the economic climate, there are fewer job opportunities and more situations requiring general assistance. Also, during a recession, the periods of need are likely to be longer and, for families with children, are unable to be remedied by the Emergency Assistance Program.

The table below compares the GA Program in 1980 against the previous fiscal year.

General Assistance Program
Monthly Averages
Fiscal Year 1980 Compared with Fiscal Year 1979

Category	Fiscal Year 1980	Fiscal Year 1979	Change from Fiscal Year 1979
Cases	11,366	10,709	657 (6.1%)
Recipients	12,953	12,357	596 (4.8%)
Expenditures	$1,726,558	$1,563,556	$163,002 (10.4%)

Of the changes occurring between fiscal year 1980 and fiscal year 1979, expenditures changed the most. This is somewhat misleading since expenditures would have increased only 3% were it not for a 7% increase in standards which became effective July, 1979.

The following table depicts various case categories and their respective monthly expenditures during fiscal years 1980 and 1979. It can be observed that the number of cases advanced in the Single and Families with Adults categories.

However, in all case categories, payments per case advanced during fiscal year 1980. These payment changes were as follows: Single +4.4%, Families with Children +3.9%, and Families with Adults +4.4%.

Average Monthly Cases and Expenditures
by Type of Case
Fiscal Year 1980 and 1979 Compared

	Fiscal Year 1980			Fiscal Year 1979		
	Cases		Expenditure	Cases		Expenditure

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $22,900 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis
